Fruit & Flower Guide

BUNTINGS' NURSERIES, Inc. Selbyville, Delaware

3 Generations of Profitable Experience *backing the* **BUNTING ORGANIZATION**

About Shipping Time, Etc.

SHIPPING SEASON. We begin filling orders about September 1st and continue digging and shipping during the entire fall, winter and spring until June 1st. We are sometimes delayed in January, February, and the early part of March by freezing weather, but usually are able to ship most of the time during these months.

TERMS. Cash with order, but orders will be booked if one-fourth value is received with order, remainder to be sent before time of shipment. Remit by money order, registered letter, check or draft. Prices quoted herein are F. O. B. Selbyville. At these very reasonable prices we do not prepay transportation.

GUARANTEE. We guarantee to pack and ship good, clean, thrifty, well-grown trees and plants in good growing condition, and under ordinary conditions, if properly transplanted and cared for, will grow. We cannot, under all circumstances, guarantee trees and plants to grow, because there are so many reasons for their failure that are entirely beyond our control, such as improper planting, over-fertilization, droughts, floods, frosts, etc. Claims, if any, must be made within five days from receipt of stock.

REFERENCE. We refer you to Dun & Bradstreet, Inc.; Baltimore Trust Company, of Selbyville, or any business house in Selbyville.

Telegraph or telephone us at Selbyville, Delaware. Telephone No. 2321.

CULTI-
VATION

From this building we pack for shipment the larger orders for Evergreens.

Assembling Department for Asparagus and Strawberry Plants exclusively.

From this building all Parcel Post orders are assembled for a general line of trees and plants. 50,000 to 60,000 orders are shipped from this department each year to all parts of the U. S. A.

We oftentimes wonder if those who invest their money in perishable products like trees and plants realize the value of such facilities as our modern packing houses, where your orders can be handled without any damage to the roots from dry winds or frosty atmospheres. We have invested carefully in such buildings to facilitate our organization in sending you trees and plants in good, live growing condition. Damp sphagnum moss is used at the roots when packing for shipment the trees and plants you receive from us.

enthusiasts.

A Message

**To Those Interested in Purchasing
Good Trees and Plants**

The success of any new settlement in any new land invariably started from the products of the soil; this will always be true. Hence, real estate will continue to be our best asset when needed most, which is in times when all other possessions of importance have declined in value.

Our homes are the base of what we are as a nation, and planting of fruits and flowers will always be foremost in mind and of greatest value. The results of such plantings are profitable because they produce the basic necessities of life—food and shelter—two of the most important means to comfort, health and contentment. We have been growing and selling trees and plants for about thirty years, and have seen many changes in general conditions throughout the nation. There never has been and never will be a time when trees and plants (and their product) will not be a necessity of first consideration in life.

We solicit your order, and assure you it will at all times receive our careful attention.

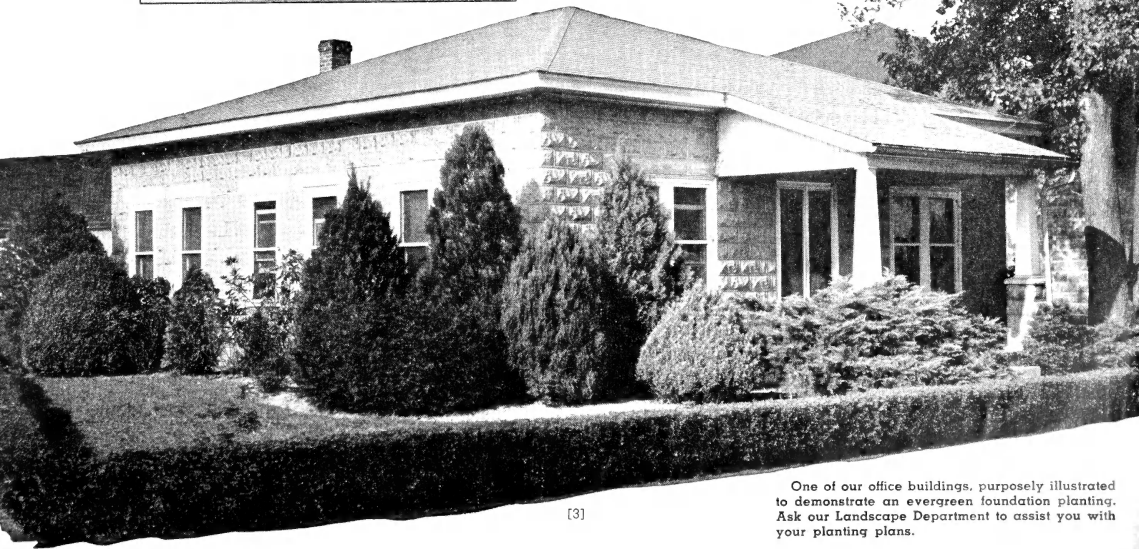

Sincerely,
CLAYTON A. BUNTING,
President

America's Finest Everblooming Roses

The varieties listed have been selected from a great number of varieties, inspected and approved by rose experts. We do not believe it necessary for you to spend hours checking rose gardens or catalog descriptions before placing an order for rose bushes, because we are confident that with our experience growing roses, checking them in private and state gardens throughout the country, we are offering a list that will please the more discriminating class of rose enthusiasts.

Buntings' Approved List of Hybrid Tea Roses

BETTY UPRICHARD. Deep toned carmine with coppery orange blend; interior mostly delicate salmon-pink. Very choice.
BRIARCLIFF. Handsome flowers of silvery rose-pink.
CALEDONIA. Exquisite long buds of ivory-white, changing to pure white as the flowers open. The best white.
CONDESSA DE SASTAGO. The first fully double variety to carry the vivid colors of coppery red and yellow. Delicately perfumed; vigorous grower.
DUCHESS OF LUXEMBOURG. Rich golden yellow.
DUCHESS OF WELLINGTON. Large, well-formed buds, opening to semi-double saffron-yellow flowers, stained with crimson and changing to lighter yellow.
EDEL. White with faint ivory shading; fragrant.
EDITH NELLIE PERKINS. Delicate color blends of light cerise-pink and gold.
ETOILE DE FRANCE. Well-formed buds that develop into full open flowers of red and soft velvety crimson, shading to vivid cerise.
GOLDEN DAWN. Fragrant blooms of sunflower-yellow; healthy foliage.

GRUSS AN TEPLITZ. Bright scarlet, shading to velvety crimson; fragrant, free flowering.
JOANNA HILL. Double blooms of golden buff, yellow center; fragrant.
LADY ASHTOWN. Very pale solid carmine-pink; yellow base.
LADY HILLINGTON. Apricot-yellow, profuse bloomer.
LOS ANGELES. Flame-pink buds, long and pointed.
MARGARET MCGREDY. One of the most popular Red Roses. Almost always in bloom; a thrifty, vigorous grower.
MRS. CHARLES BELL. Soft, salmon-pink; sweetly fragrant.
MME. EDOUARD HERRIOTT. Coral-red, free blooming variety.
PINK RADIANCE. Extra hardy, vigorous and prolific. A most popular variety.
RED RADIANCE. Large, globular flowers of an even, clear red. Constantly in bloom. Very popular.
SYRACUSE. A new Rose, outstanding in the brilliance of its bright crimson hue.
TALISMAN. A multi-color rose of orange, yellow and rose-red; a favorite variety.

PRICE: All varieties Roses listed on this page, extra heavy, 2-yr., No. 1 plants, 70c each; 3 for \$2.00; 6 for \$3.75; 10 for \$6.00.

DWARF POLYANTHA ROSES

(Everblooming Baby Polyanthas)

This class of Roses is especially fine for solid beds, also borders. They will produce an abundance of beautiful flowers, in close compact clusters. Bloom all summer and until freezing weather. Very hardy; grow anywhere, require little care.

CAMEO. Shell-pink and salmon, with a glow of gold; blooms continuously.
ELSE POULSEN. Bright, semi-double pink flowers, borne on erect stems.

IDEAL. Dark scarlet in immense compact clusters.

CLIMBING AND PILLAR ROSES

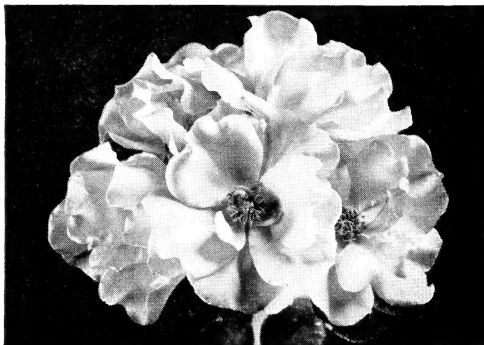

We list below the finest and most popular climbing Roses. All plants are healthy, strong two-year field-grown stock.

Cl. American Beauty. Large buds and flowers of bright crimson.
Cl. Caledonia. Large white, double flowers.
Cl. Condesa de Sastago. Fiery copper to rich gold.
Cl. Etoile de Hollande. Bright red.
Cl. Pres. Hoover. Maroon, orange and gold.
Cl. Pink Radiance. Brilliant rose-pink.
Cl. Pink Radiance. Clear, brilliant red.
Cl. Talisman. Red and gold.
Crimson Rambler. Bright crimson.
Dr. Huey. Dark crimson.
Dr. W. Van Fleet. Pale pink.
Mary Wallace. Bright pink.
Paul's Scarlet. Vivid scarlet-red.
Primrose. Large, canary-yellow flowers.
Staechelein. Pearl pink petals, fragrant.
White Dorothy Perkins. Flowers white, small, crinkly, in clusters.

PRICES: All varieties listed above, extra heavy 2-yr., No. 1 plants, 70c each; 3 for \$2.00; 6 for \$3.75; 10 for \$6.00.

BUNTINGS' fine FLOWERING SHRUBS

BLOOM from APRIL to LATE FALL

White Snowberry

Spirea, Anthony Waterer

RED-LEAVED BARBERRY. Same as the popular, well-known, hardy-as-an-oak Greenleaf Barberry, except that the foliage is deep red in the spring and deep purple during the summer months. Popular for planting in clumps, hedges, as well as in foundation plantings. Price: 18-24 in., 40c each; \$3.50 per 10.

BEAUTYBUSH (*Kolkwitzia Amabilis*). A beautiful shrub covered in early May with small pink flowers on drooping branches. Price: 18 to 24 in., 60c each. 2 to 3 ft., 80c each.

BUTTERFLY BUSH. Charming. A glorious new shrub bearing throughout the late summer and autumn elegant long sprays covered with lovely lavender-pink blooms. Price: 18 to 24 in., 40c each. 2 to 3 ft., 60c each.

CRAPE MYRTLE. Spring planting only. A strong growing shrub, adapting itself to almost any soil and condition except in the northern sections where the temperature often drops below zero. Does very well south of Philadelphia. Leaves bright green; the blooms large panicles of crinkled little flowers of brilliant hues. Blooms late July and August. Price: 2- to 3-ft. plants, 80c each; 10 for \$7.50.

CORALBERRY or INDIAN CURRANT. A dwarf shrub which thrives in the shade. The coral-colored berries last until late winter, and are produced profusely. Price: 1½-2 ft., 40c each. 2-3 ft., 50c each.

DEUTZIA, SLENDER. Of dense, bushy, dwarf habit. Festoons of pure white flowers in May. Price: 12 to 15 in., 40c each. 15 to 18 in., 50c each.

BLOOD-TWIG DOGWOOD (*Cornus Alba Sibirica*). Bright cherry-red stems in winter; creamy white flowers. Price: 1½-2 ft., 40c each. 2-3 ft., 50c each.

GOLDEN TWIGGED DOGWOOD (*Cornus Stolonifera Lutea*). Very striking yellow branches in winter, and forms a good contrast when planted with the red stem sorts. Price: 1½-2 ft., 50c each. 2-3 ft., 60c each.

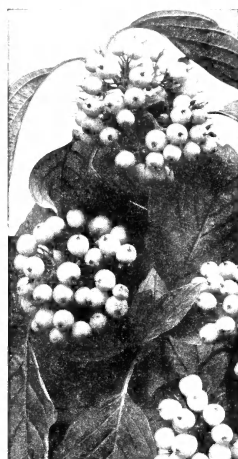

HYDRANGEA, HILLS OF SNOW (*Hydrangea A. G.*). Known for its profusion of round snow-white blooms which appear early in July and last until late September. Very hardy. Price: 18 to 24 in., 40c each; \$3.50 per 10. 2 to 3 ft., 60c each; \$5.50 per 10.

SNOWBALL (*Viburnum Opulus Sterile*). White balls of blooms in May. A well known very popular shrub. Price: 15 to 18 in., 50c each; \$4.50 per 10.

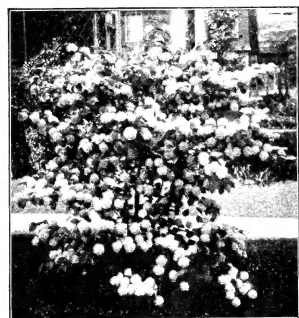

WHITE SNOWBERRY. This low, shade-loving plant bears rose-white flowers in summer, and large white berries in winter. A superb fine-textured shrub for borders and shady foundation plantings. Price: 1½-2 ft., 40c each. 2-3 ft., 50c each.

SPIREA ANTHONY WATERER. A dwarf and very dense little shrub which bears flat clusters of rose-pink flowers all summer. If the bloomed heads are removed it will continue to flower more abundantly. Price: 12 to 15 in., 40c each. 15 to 18 in., 50c each.

SWEET SHRUB (*Calycanthus Floridus*). Sometimes called the Strawberry Shrub. A widely cherished old-fashioned plant. Neat, compact, with large leaves and small double blossoms of dark mahogany color with rare fragrance. Blooms in May and June with a few blossoms from time to time during the summer. Price: 1½-2 ft., 40c each. 2-3 ft., 50c each.

LANDSCAPE YOUR GROUNDS

It's Smart Business— Increase Real Estate Values

Be your own landscape architect. Start this spring with a definite planting plan. Get your trees in, your lawn started, hedges and shrubs planted. Here is a good vigorous beginning that by the end of summer will give you a grand and glorious sense of achievement.

Clever, artistic landscaping has brought a marvelous transformation that you could scarcely believe possible a few months earlier. Buntings' landscape architects will gladly help you make the correct selection of material when you are ready to plant the garden.

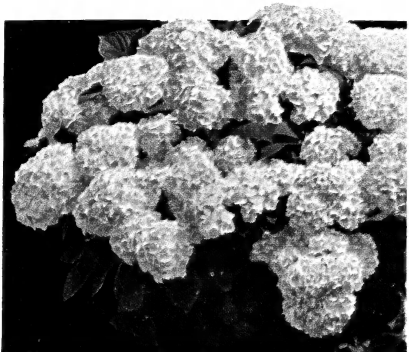

SPIREA VAN HOUTTEI. Sometimes called the "Improved Bridal Wreath." A medium-sized shrub covered in late May and June with pure white flowers. Foliage is dark green and fine texture. **Price:** 18 to 24 in., 25c each; 10 for \$2.00. 2 to 3 ft., 30c each; 10 for \$2.50.

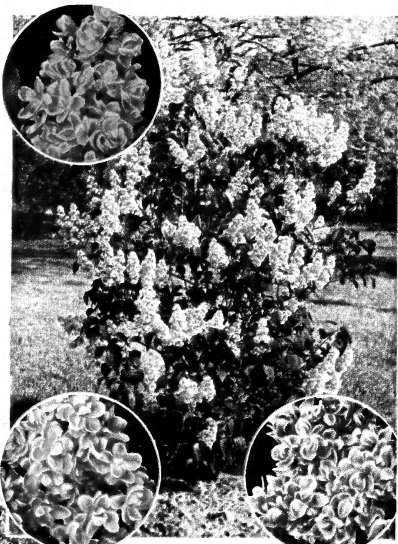

MOCK ORANGE, VIRGINAL. The new double Syringa, very hardy and vigorous, simply snowed under with hundreds and hundreds of large clusters of double-crested, sweet-scented, white flowers for many days in spring. **Price:** 18 to 24 in., 45c each; 10 for \$4.00. 2 to 3 ft., 60c each; 10 for \$5.50.

HONEYSUCKLE, TARTARIAN PINK. A profusion of lovely flowers makes a delightful contrast with bright green leaves. **Price:** 18 to 24 in., 40c each; 10 for \$3.50. 2 to 3 ft., 50c each; 10 for \$4.50.

HYDRANGEA OTAKSA. Large blue or pink blooms in mid-summer (color depending upon soil acidity). Either color is most attractive. Very popular. **Price:** Strong 2-year plants, 50c each; \$4.50 for 10. Extra heavy 3-year plants, 60c each; \$5.50 per 10.

NEW FRENCH LILACS Sweetly Perfumed

Superfine Varieties—Strong, Heavily Rooted

CHARLES THE TENTH. Reddish purple.
HUGO KOSTER. Dark reddish purple.
MME. CASIMIR PERIER. White.
FRS. GREVY. Light blue. Large panicles.
SOUVENIR DE LUDWIG SPAETH. Very large purplish red.

Price all varieties New French Lilacs listed:
18 to 24 in., 60c each; 10 for \$5.50.

HYDRANGEA PEE GEE. Pyramids of creamy white flowers which are tinged with pink in late summer. **Price:** 18 to 24 in., 40c each; \$3.50 for 10. 2 to 3 ft., 60c each; \$5.50 for 10.

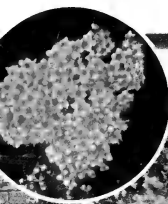

FLOWERING QUINCE (*Cydonia japonica*). Literally covered with brilliant double, scarlet blossoms in early spring. Price: 1½ to 2 ft., 40c each; 2 to 3 ft., 50c each.

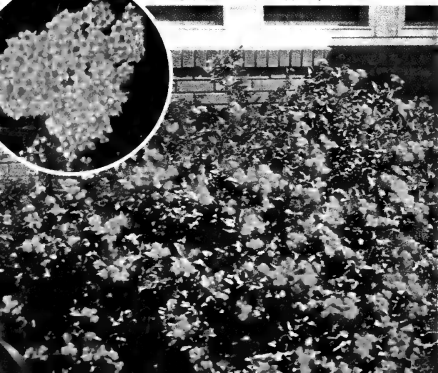

SPIREA BILLARDI. Erect, sparsely twigged branches, crowned with dense spikes of rose-pink flowers from July to September. Price: 1½ to 2 ft., 35c each; 2 to 3 ft., 45c each.

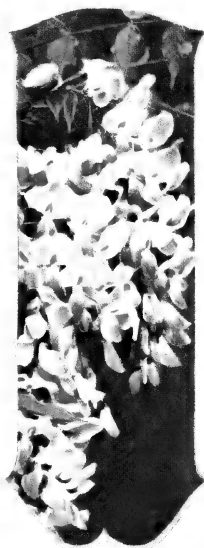

ALTHEA, Rose of Sharon. Upright, very hardy. Color spot of the fall. Your choice of red, white, pink or blue. Price: 1½-2 ft., 40c each. 2-3 ft., 50c each.

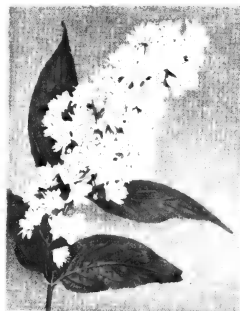

DWARF CRIMSON SPIREA. Very dense growing plant, with clusters of rose-pink flowers all summer. Price: 12 to 15 in., 40c each. 15 to 18 in., 50c each.

ALMOND, Double Flowering. Blooms early spring. Your choice of pink or white. Price: 1½ to 2 ft., 50c each. 2-3 ft., 60c each.

PURPLE WISTERIA. Purple blossoms in great profusion during spring. Fine for porches and trellises. Strong 2-yr. vines. 50c each.

DEUTZIA, Pride of Rochester. Blooms in May, large double flowers. Price: 1½ to 2 ft., 30c each. 2 to 3 ft., 40c each.

WEIGELA ROSEA. Remarkably showy, trumpet-shaped flowers of brilliant pink in June and July. Price: 1½ to 2 ft., 40c each. 2 to 3 ft., 50c each.

WEIGELA EVA RATHKE. Dark reddish green foliage, attractive, deep crimson flowers throughout summer and fall. Price: 1½ to 2 ft., 40c each. 2 to 3 ft., 50c each.

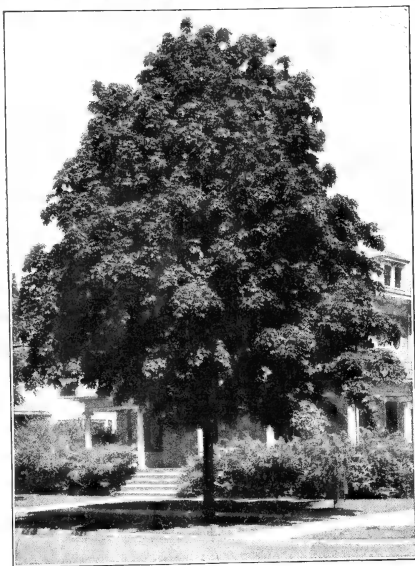

FARQUHAR BUTTERFLY BUSH. Lilac-colored flowers from early August until autumn. Vigorous grower. Price: 1½ to 2 ft., 30c each. 2 to 3 ft., 50c each.

FORSYTHIA FORTUNEI (Golden Bell). Their bright masses of golden yellow appear in April, before any foliage, vigorous grower. Price: 1½ to 2 ft., 40c each. 2 to 3 ft., 50c each.

BEST ORNAMENTAL LAWN & STREET TREES

STRAIGHT STEMS — WELL BRANCHED — HEAVY-ROOTED — BIG VALUES

Norway Maple

Maidenhair Tree

EUROPEAN MOUNTAIN ASH. A very attractive small, hardy tree which bears clusters of scarlet berries from July to winter. **Price: 6-8 ft., \$2.25 each.**

CUTLEAF WEEPING BIRCH. Distinguished for its white bark, light green leaves which are finely cut, and its long drooping branches. **Price: 6-8 ft., \$2.50 each.**

CATALPA BUNGEI. The familiar round-headed dwarf tree. **Price: 2-yr. heads, 5-6 ft. stems, \$2.00 each.**

AMERICAN ELM. A stately and dignified tree. Popular for street, park and roadway. **Price: 6-8 ft., \$1.00 each; 8-10 ft., \$1.25 each.**

CHINESE ELM. A very rapid growing tree of dense pyramidal form. Slender, grayish branches, and small, fresh green leaves. **Price: 6-8 ft., \$1.50 each.**

SWEET GUM. Large star-shaped leaves, which turn to a blazing scarlet in the fall. Compact, strong grower; a clean, stately and well-shaped tree. **Price: 6-8 ft., \$2.50 each.**

MAIDENHAIR TREE. Tall, narrow, sparsely branched tree. The leaves, in form, resemble the maidenhair fern. Will withstand extreme heat or cold. **Price: 6-8 ft., \$3.00 each.**

SILVER MAPLE. Well known, most popular rapid growing shade tree. **Price: 6-8 ft., \$1.15 each; 8-10 ft., \$1.50 each.**

SUGAR MAPLE. An excellent shade, park, or driveway tree, oval in form and very dense. **Price: 6-8 ft., \$2.00 each.**

SCHWEDLER MAPLE. Similar to the Norway Maple in form and leaf except the leaves are red in spring and early summer, and turn to purple in late summer and fall. **Price: 6-8 ft., \$2.50 each.**

NORWAY MAPLE. Symmetrical, dense, round-headed tree; well known, justly popular. **Price: 6-8 ft., \$2.00 each; 8-10 ft., \$2.75 each.**

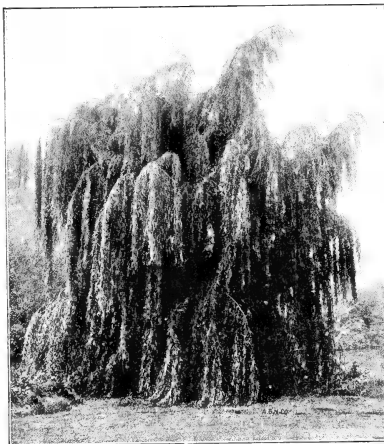

BLOODLEAF MAPLE. Intense bloodred leaves throughout spring; purple during summer and autumn. A dwarf bushy tree for the lawn. **Price: 18-24 in., B&B, \$2.25 each; 2-3 ft., B&B, \$3.50 each.**

PIN OAK. Preferred of all the Oaks. Perfectly symmetrical tree. Bright shiny green foliage which is deeply cut. **Price: 6-8 ft., \$1.75 each; 8-10 ft., \$2.50 each.**

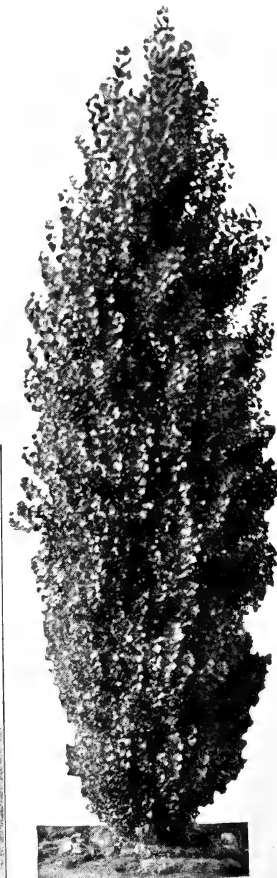

ORIENTAL PLANE. Considered the most popular and successful tree for city planting. Dense grower; very symmetrical. **Price: 6-8 ft., \$1.25 each; 8-10 ft., \$1.75 each.**

LOMBARDY POPLAR. A tall spirelike tree. Effective for screens and vertical accents. See illustration. **Price: 6-8 ft., 75c each; 8-10 ft., \$1.00 each.**

WISCONSIN WEEPING WILLOW. Most popular of all Weeping Willow trees. See illustration. **Price: 6-8 ft., \$1.00 each; 8-10 ft., \$1.25 each.**

Untrimmed Weeping Willow

Lombardy Poplar

Hemlock
Spruce

CHOICE Specimen *Evergreens* For Lawn PLANTINGS

Modern landscape demands these beautiful evergreens—their elaborate foliage pattern, and rich color blends.

ARBOR-VITAE

AMERICAN ARBOR-VITAE. Foliage flat, set on edge, color bright green. One of the most extensively planted Arbor-Vitae. Price: 18 to 24 in., \$1.25 each; 2 for \$2.40.

BERCKMANN'S GOLDEN ARBOR-VITAE. Conical form, very dense and compact; bright yellow foliage. Price: 12 to 15 in., \$1.50 each; 2 for \$2.90.

CHINESE ARBOR-VITAE. Tall, slender, fast grower; dark green foliage. Price: 2 to 3 ft., \$1.50 each; 2 for \$2.90.

GLOBE ARBOR-VITAE. Very dwarf, round or globe shaped; foliage dark green. Price: 10 to 12 in., \$1.25 each; 2 for \$2.40.

PYRAMIDAL ARBOR-VITAE. Tall, slender, dense, dark green foliage. The best Arbor-Vitae grown. Price: 2 to 3 ft., \$2.00 each; 2 for \$3.90.

HEMLOCK

HEMLOCK SPRUCE (Canadian Hemlock). Graceful tree with dark green foliage; very hardy. Price: 18 to 24 inch, \$1.50 each; 2 for \$2.90.

YEW

UPRIGHT YEW (*Taxus cuspidata*). A beautiful slow growing evergreen, with rich dark green foliage throughout the year. Price: 18 to 24 inch, \$2.50 each; 2 for \$4.90.

SPREADING YEW (*Taxus cuspidata*). A compact, spreading variety; dwarf habit of growth. Very hardy; handsome dark green foliage. Covered with bright rosetted fruits in autumn. Price: 15 to 18 inch, \$2.00 each; 2 for \$3.90.

JUNIPER

IRISH JUNIPER. Trees form dense slender cones of silvery green. Price: 18 to 24 in., \$1.25 each; 2 for \$2.40.

PFITZER'S JUNIPER. Broad, bushy, with gray-green branches. Price: 15 to 18 in., \$1.75 each; 2 for \$3.40.

SAVIN JUNIPER. Low growing, very dwarf. Dark green foliage, very desirable. Price: 12 to 15 in., \$1.35 each; 2 for \$2.60.

RETINOSPORA

GREEN PLUME RETINOSPORA. Soft, deep green foliage. Strong growing tree. Price: 15 to 18 in., \$1.25 each; 2 for \$2.40.

GOLDEN PLUME RETINOSPORA. Foliage and growth like the Plume Retinospora, except that the foliage is tipped with bright gold. Price: 15 to 18 in., \$1.25 each; 2 for \$2.40.

DWARF ENGLISH BOXWOOD. The true, dwarf, old English variety. Low, very slow growing; a truly aristocratic plant. Price: 8 to 10 in., \$1.00 each; 10 to 12 in., \$1.25 each.

BUSH ARBUTUS (*Abelia Grandiflora*). Blooms May to frost. A compact, graceful bush; stands shearing well. Foliage bright, glossy green, turning bronze in winter. Blooms funnel-shaped, light pink. Price: 18 to 24 in., \$1.00 each; 2 to 3 ft., \$1.25 each.

AZALEA HINODEGIRI. Bright scarlet flowers completely cover the plant in spring; deep green foliage. Price: 8 to 10 in., \$1.25 each; 10 to 12 in., \$1.50 each; 6 to 8 in., \$1.00.

Vines

NATURE'S DRAPERIES THAT CLING AND CLIMB

BITTERSWEET (*Celastrus scandens*). Attractive light green foliage and yellow flowers during June. Price, strong, 2-year vines, 40c each.

BOSTON IVY (*Ampelopsis Veitchii*). Grows very dense. Foliage green and very healthy. Price, 2-yr. vines, 40c each.

CLEMATIS PANICULATA. Flowers snow-white during entire summer and autumn. Price, 2-yr. vines, 40c. each.

CLEMATIS, LARGE FLOWERED. Very popular. Profusion of large flowers during summer and autumn. Varieties: *Andre*, red; *Henryi*, white; *Jackmani*, purple; *Ramona*, blue. Price, 2-yr. vines, 60c each; 10 for \$5.50.

ENGLISH IVY (*Hedera helix*). Foliage rich waxy green during entire winter. Price, 2-yr. vines, 40c each; 10 for \$3.50.

HALL'S HONEYSUCKLE. White flowers from May until November. Price, 2-yr. vines, 40c each; 10 for \$3.50.

SILVER LACE VINE (*Polygonum Auberti*). Very fragrant white flowers during the month of September. Price, 2-yr. vines, 60c each.

TRUMPET VINE (*Bignonia radicans*). Orange flowers in midsummer. Price, 2-yr. vines, 35c each.

Goldflame Honeysuckle

GOLDFLAME HONEYSUCKLE. Blooms all summer. Showy tubular flowers, flame-red outside, bright yellow inside, borne in clusters. Delightfully fragrant. 2-yr. vines, 75c each; \$7.00 per 10.

Red Leaf Barberry

Hedges

GREENLEAF BARBERRY. Well known; needs little description. Dark green leaves which turn to red and yellow in the fall. Thorny bush, which makes good hedge or specimen plants. Graceful, drooping branches are loaded late in summer with bright red berries that hang on most of the winter.

	10	100
2-yr., 9 to 12 in.	\$0.50	\$4.00
2-yr., 12 to 18 in.75	5.00
2-yr., 18 to 24 in.	1.00	7.00
4-yr. extra heavy transplants	3.00	26.00

REDLEAF BARBERRY. Same as the popular, well-known, hardy-as-an-ox Greenleaf Barberry, except the foliage is deep red in the spring and deep purple during the summer months. Popular for planting in clumps, hedges, as well as in foundation plantings.

	10	100
2-yr., 9 to 12 in.	\$1.50	\$12.00
2-yr., 12 to 18 in.	2.00	17.50
2-yr., 18 to 24 in.	2.75	25.00

CALIFORNIA PRIVET. America's leading hedge plant. Its foliage is of the deepest, richest green and stays on until late winter. Very hardy; easily and quickly pruned.

	10	100	1000
12 to 18 in.	\$0.65	\$5.00	\$40.00
18 to 24 in.75	6.00	50.00
2 to 3 ft.	1.00	8.00	70.00
3 to 4 ft.	1.25	10.00	90.00

AMUR RIVER PRIVET. Hardy, vigorous grower. Pointed glossy green leaves, produced thickly on upright branches. Excellent for clipped hedges and unclipped screens.

	10	100	1000
12 to 18 in.	\$0.65	\$5.00	\$40.00
18 to 24 in.75	6.00	50.00
2 to 3 ft.	1.00	8.00	70.00
3 to 4 ft.	1.25	10.00	90.00

SPIREA VAN HOUTTE. (*Bridal Wreath*). Beautiful hedge with masses of white flowers in early spring. Grows six to eight feet high. Plant 12 to 18 inches apart.

	10	25	100
12 to 18 in. hedge grade	\$0.80	\$1.75	\$8.00
18 to 24 in. hedge grade	1.25	2.75	10.00
2 to 3 ft. hedge grade	1.75	4.00	15.00

California Privet

Flowering Trees

Excellent for Accent or Specimen Planting

There is a place on every lawn for one or more of these choice Flowering Trees. They are hardy, prized not only for their beauty but for shade, grow larger year after year, and we do not know of any other tree or plant that provides so much for the original amount of money invested.

DOUBLE FLOWERING CHERRY. Well known because of the renowned plantings in Washington, D. C. Varieties: **Kwanzan**, double, dark pink; **Yoshino**, single white; **Naden**, double, deep pink. Order by variety. **Price:** 3 to 4 ft., \$1.50 each; 4 to 5 ft., \$2.00 each.

WEeping FLOWERING CHERRY. A weeping form of the popular Double Flowering Cherry. Has slender, pendulous branches hanging nearly to the ground. In early May the branches are strung thickly with showy rose-pink flowers. **Price:** 2-year heads, 5-6 ft. stems, \$3.50 each.

DOUBLE FLOWERING PEACH. Small trees, covered in early spring with double, roselike flowers. Colors: Red, white, and pink. State choice of color. **Price:** 3 to 4 ft., 40c each; 4 to 5 ft., 60c each.

DOUBLE FLOWERING PLUM. A profusion of blooms in May. Deep red foliage all summer and spring. **Price:** 3 to 4 ft., 50c each; 4 to 5 ft., 80c each.

JUDAS TREE (Redbud). A small tree or large bush with a broad round top. In May, before the leaves appear, it bears dense masses of deep rose-pink flowers. **Price:** 4 to 5 ft., 75c each.

TULIP TREE (Tulip Poplar). A magnificent tree, pyramidal in habit and quick in growth, which is known for its free and graceful branching and its glossy blue-green foliage. In June it is beautifully adorned with a multitude of large tulip-like flowers with orange centers. **Price:** 6-8 ft., \$2.00 each.

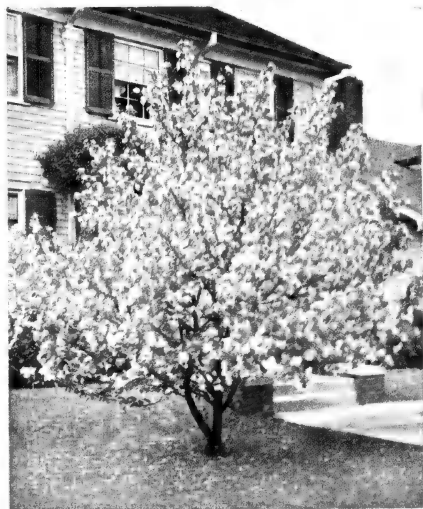

WHITE FLOWERING DOGWOOD. In early May this small native tree is a cloud of white flowers, and in the autumn the upper sides of the leaves turn a brilliant crimson. **Price:** 2 to 3 ft., 60c each; 3 to 4 ft., 80c each.

Cornus Florida Rubra — Pink Flowering Dogwood

Flowering Peach

Bechtel's Flowering Crab

PINK-FLOWERING DOGWOOD. A profusion of pink and red flowers in May. Its foliage is unusually brilliant in the fall. **Price:** 2 to 3 ft., \$1.50 each.

BECHTEL'S FLOWERING CRAB. A double flowering variety, with blooms of light pink color, appearing as small roses. Medium sized tree with open branches. **Prices:** 3 to 4 ft., \$1.00 each.

HOPA FLOWERING CRAB. A handsome ornamental tree. An abundance of bright red flower clusters in the spring. **Price:** 3 to 4 ft., 75c each; 4 to 5 ft., \$1.00 each.

TIPS on Distance to Plant - - Number per Acre for Small and Large Fruits, Asparagus, Etc.

Distance for Planting—Square Method

Distances for planting different kinds of fruit trees, etc., square method:

Peach. 20 feet apart each way.
Standard Apple. 35 feet apart each way.
Cherry, Sour. 18 feet apart each way.
Cherry, Sweet. 20 feet apart each way.
Standard Pear. 20 feet apart each way.
Plum. 20 feet apart each way.
Grape Vines. Rows 8 feet apart, 8 feet apart in row.
Currants and Gooseberries. Rows 4 feet apart, 4 feet apart in row.
Blackberries. Rows 6 feet apart, 8 feet apart in row.
Black Raspberries. Garden culture, 4x3 ft.
Black Raspberries. Field culture, 7x4 ft.
Red Raspberries. Garden culture, 4x3 ft.
Red Raspberries. Field culture, 7x3 ft.
Dewberries. Rows 4 feet apart, 5 feet apart in row.
Strawberries, Field Culture. Rows 4 feet apart, 1½ feet apart in row.
Strawberries, Garden Culture. Rows 2 feet apart, 1 foot apart in row.
Asparagus, in Field. Rows 5 feet apart, 2 feet apart in row.
Asparagus, in Beds. Rows 1½ feet apart, 1 foot apart in row.

Rules for Other Distances

Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of square feet in an acre (43,560), will give the number of plants or trees to an acre.

Number of Trees Required to Set an Acre at Various Distances

	Trees per Acre
Trees planted 35 feet apart each way	35
Trees planted 30 feet apart each way	49
Trees planted 25 feet apart each way	69
Trees planted 20 feet apart each way	109
Trees planted 18 feet apart each way	137
Trees planted 16 feet apart each way	170
Trees planted 14 feet apart each way	222
Trees planted 12 feet apart each way	302
Trees planted 10 feet apart each way	435
Trees planted 8 feet apart each way	680
Trees planted 6 feet apart each way	1,210
Trees planted 4 feet apart each way	2,722
Trees planted 3 feet apart each way	4,840

Number of Plants Required to Set an Acre at Various Distances

1 x 1 ft.	43,560	4 x 2 ft.	5,445
2 x 2 ft.	10,890	5 x 1 ft.	8,712
3 x 1 ft.	14,520	5 x 2 ft.	4,356
3 x 1½ ft.	9,900	6 x 1 ft.	7,260
3 x 2 ft.	7,260	6 x 2 ft.	3,630
4 x 1 ft.	10,890	7 x 1 ft.	6,222
4 x 1½ ft.	7,260	7 x 2 ft.	3,111

Growing Strawberries Profitably

Planting Time

Northern States—April and early May.

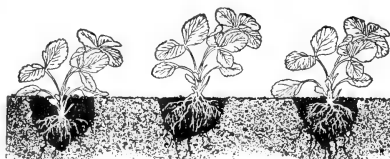

Central States—March and April.

Southern States—February and March.

Each year we are surprised that so many people think you can postpone setting Strawberry plants during spring months, expecting to make up lost time by setting them in summer or early fall; it cannot be done successfully. Early spring is the ideal time to set Strawberry plants, as soon as the weather permits preparing the ground. In the southern states, we recommend February and March; in the central states, March and April; in the northern states, April, or as early in May as possible. Place your order early so as to allow ample time for material to reach you at the time you wish to plant. You realize it requires time for your order to reach the nursery after it has been placed in the mails, and while we are thoroughly organized to handle all business promptly, we have adverse weather conditions, etc., which hold up digging and packing of plants. Under ordinary conditions, however, plants are shipped in two or three days after your order is received.

Type of Soil

For best results, select a plot springy in nature but well drained and free of vegetation. Strawberry plants are not like trees. They are small and do not root deeply in the soil. Moisture is essential. Should you have a plot of land which you contemplate setting to Strawberries, keep the crop as free from vegetation as possible during the previous year. If the land has been lying idle, plow late in the summer before the weeds and grass develop seed to maturity. This will eliminate crop of weeds and grass the next season. Heavy crops of Cow Peas, Soy Beans, or any other, if plowed under in late summer while green, increase the humus and fertility of the soil, making it loose and porous; therefore, the more retentive of moisture.

Too Deep

Too Shallow

Correct Depth

Soil Preparation and Fertilization

Prepare soil same as for truck or garden crops. Lay out rows, usually 3 feet 6 inches to 4 feet apart; set plants about 15 to 18 inches apart in the rows. Do not use commercial fertilizer at the roots. Ground animal bone, thoroughly mixed with the soil, is fine to use at the roots. It should be placed in bottom of furrow before row is made up. Spreading good barnyard manure on the land before plowing is preferable to ground animal bone. If soil is fertile, we do not recommend using any type of fertilizer when planting.

During January, February or very early March (January or February preferred), apply a good grade of commercial fertilizer carrying an analysis of 5 per cent ammonia, 6 to 8 per cent phosphoric acid and 10 per cent potash, broadcast on the row of plants at the rate of 15 to 20 pounds per hundred yards of row space. This is all the plant food necessary to reap a bumper crop of good quality fruit.

Setting Plants

Clip the roots if they can't be planted without doubling. Some varieties naturally grow larger than others, and require slight clipping before being transplanted. The plant should be set with the crown about even with the soil after it has been thoroughly firmed around the plant.

Cultivation

Keep Rows Free of Vegetation

As soon as the plants are set in the spring, cultivation should begin and should be continued whenever weeds start or a crust forms. Frequent shallow cultivation will make it unnecessary to do much hand hoeing or hand weeding. The cultivator, which merely loosens the top soil without breaking the roots, is to be preferred. Any weeds which interfere with the development of plants or fruit during the picking season are pulled by hand or cut off with sharp hoes. Tests have shown that Strawberry fields which receive frequent hoeing and cultivation made larger, stronger fruiting beds and produced a better crop of berries.

Mulching

After the first freeze during fall months, wheat or rye straw, or marsh grass, may be applied over the rows of plants for winter protection. Early in the spring, before growth starts, it should be removed from the plants and placed between the rows. By this time it has served its first purpose, protection of the plants during the cold winter weather. When placed between the rows, it retains moisture, and prevents particles of sand or earth from spattering the berries, insuring the berries being clean when placed on the market.

The above illustration is one of our Strawberry plants (the variety Mastodon). Well-formed crowns and lengthy, fibrous roots are Bunting requisites that guarantee success.

Illustration left—partial view of one of our Strawberry fields. Note vigorous growth.

Ambrosia

AMBROSIA

Ambrosia is Buntings' Recommendation for a bumper crop of late berries. Considered to be the latest, largest and best late Strawberry ever introduced.

Prove to your own satisfaction that this late-bearing berry is a worthy companion to our other leaders, viz.: Starbright, Dorsett, Fairfax, Premier, Blakemore, Catskill, Chesapeake and Big Joe. Berries are very large, semi-pointed. Rich sparkling bright red, delicious flavor. Ripens 3 weeks later than Premier, when other strawberries are gone. Is self-pollenizing and extremely hardy. Fruit stems are very rigid and often attain a height of 6 inches. Berries develop in the shade of the leaves and off the ground which makes clean fruit.

CRESCO. A cross between Premier and Dunlap, which retains the rich color and flavor of Dunlap together with the larger size of Premier. Particularly successful in the mid-western states; it stands up well in dry weather and makes a good fruiting bed under adverse weather conditions.

FAIRMORE. Starts ripening with Blakemore. Very productive of glossy crimson fruit, carrying a large and attractive cap.

GANDY. (Perfect.) Does best in springy land with some clay in its makeup. Fruit is large, firm, and of fine flavor. A good long distance shipper.

GEM. It's a GEM and rightly named. This variety is one of the greatest everbearers, and should be planted as a companion with Mastodon. Berries are long and we find them to be as productive but not quite so large as Mastodon. They ripen evenly and are light red all the way through.

HEBRON. A leading new late variety developed by the Connecticut Agricultural Experimental Station. Fruit very firm, attractive in color and general appearance; heavy yielder. A good strong grower.

HOWARD 17. This variety is the same as Premier. One of the best early varieties.

KLOUNDYKE. (Perfect.) Berries dark red, mild and delicious. Recommended for the South and Pacific Coast states.

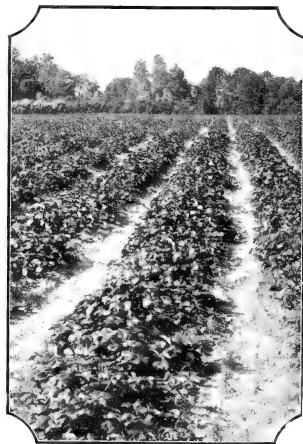

ABERDEEN. (Perfect.) Fruit of fair quality, somewhat acid, ripens in midseason.

AROMA. (Perfect.) Late. Plants are large, very vigorous and healthy. Fruit is large, bright glossy red, of excellent carrying quality, and one of the most productive late varieties.

BEAVER. (Perfect.) Extra early. Berries solid, medium to large and of good quality.

BELLMAR. (Perfect.) Fruit is of a combination Premier-Missionary type, colored darker than Premier and somewhat lighter than Missionary.

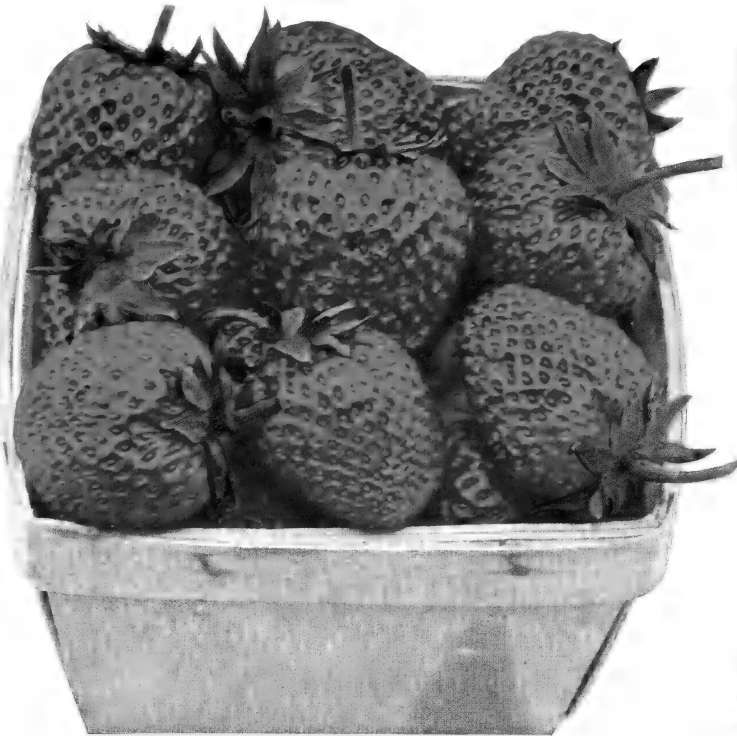

BIG JOE. Midseason. Ripens about three days before Gandy. Fruit is firm and of large size, good color and of a delicious flavor; no green tips, wonderfully productive; plants are strong growers and thrive on any soil that will produce strawberries.

A partial view of a field of Buntings' Strawberry Plants growing on the grounds of one of our customers.

The Bunting family were pioneer growers of strawberries and strawberry plants in this section of the country, and due to our long experience we are in position to supply you with plants unexcelled by any other grower.

Due to the severe drought which prevailed during the entire growing season of spring, summer and fall 1941, there are less strawberry plants available in this country than at any time during the past 25 years. Place your order early, regardless of the nursery from whom you may be buying.

Dorsett Strawberries

LATE GIANT. (Perfect.) Berries are dark red all the way through and honey-sweet, firm and of extra good quality. Heavy cropper. Ripens about the middle of June.

LUPTON LATE. Berries large, bluntly conical, with double, dark green cap. An excellent shipper.

MASTODON. See back cover page.

MISSIONARY. (Perfect.) A good early variety. At least 95 per cent of the strawberries grown in the state of Florida are Missionary. A strong grower and productive. The berries are well colored and firm.

NEW YORK. (Perfect.) Midseason. Fruit large, well colored. A good mid-season variety for the northern states.

NORTH STAR. A fine new variety, recently released for introduction by the U. S. Department of Agriculture. A medium early, firm, commercial and home-garden variety of high quality.

PARSONS' BEAUTY. (Perfect.) Midseason. Fruit is large, conical, uniform in shape, dark red, and fair quality. A strong pollinizer.

PATHFINDER. Berries medium to large in size and of good appearance. Ripens just after Premier. Healthy vigorous grower.

RED GOLD. (Perfect.) Early. Ripens earlier than Premier. Brilliant red berries with tender flesh and sweet, melting flavor.

SENATOR DUNLAP. Fruit is of good size and a beautiful bright red color, glossy and very firm. It is a splendid shipper and of excellent quality when grown in the regions adapted for it.

SOUTHLAND. Large, firm berries, very fine quality. Plants make a healthy, vigorous growth. Particularly recommended for the southern states.

DORSETT

Its Bright Red Color and Rich, Delicious Flavor Always Bring Top Market Prices

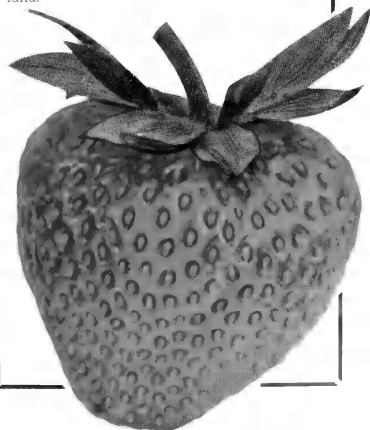

Ripening early, with Premier and Blakemore, this variety has rapidly come to the top in favor. Originated in 1923 by the U. S. Dept. of Agriculture, introduced in 1934, Dorsett is now well known and widely planted in all strawberry sections of the United States. In this latitude it does exceptionally well. Very resistant to leaf spot diseases. Its flavor is mild sub-acid, sweet and very pleasing. The fruit is usually conic in shape, bright red in color, somewhat firmer than Premier but not as firm as Fairfax.

For prices, see page 15.

CHESAPEAKE

**—a popular seller
in late berries**

A market berry that withstands long hauls, maintaining its color and firmness. Tested ourselves commercially for years, we have nothing but praise to offer for Chesapeake. We recommend it to our commercial and home-garden friends as a good profit berry. The berries are large and hold their size well to the end of the season. Unsurpassed in quality among the late varieties. The berries are always firm and excellent to ship long distances. Chesapeake does best in good fertile land.

Catskill

CATSKILL

**An Outstanding Midseason Variety,
Becoming More Popular Every Year**

Originated in 1934, from a cross between Premier and Marshall. Produces large, strong plants; makes an ideal fruiting bed. The berries are large in size, bright red color. Equals Premier in flavor and carries a bright green cap. Firm enough to arrive on the market in excellent condition. It is considered almost frost-proof, and can be depended upon to produce annually bumper crops of fruit. That's the story on Catskill.

For prices see page 15.

FAIRFAX

*The
Quality Berry*

A Favorite In Quality, Flavor and Productiveness—a Bunting Recommendation

Originated and introduced with Dorsett; now widely known and planted. Far superior to all other varieties we know of in quality, and for home garden or local markets it cannot be beat. Fairfax has a tendency to become dark when over-ripe (although it remains solid and full flavored), and for this reason the berries should be kept picked as they ripen. The berries are exceptionally large all through the fruiting season, and very firm. Starts ripening about 2 days after Dorsett, and fruiting season covers a long period. The plants are large and vigorous. Plant Fairfax for its superb flavor, large size and universal demand.

Fairfax

Premier~

Premier

NO CROP FAILURES

Always a Heavy Yields, Frost-Proof—An Excellent Variety for Northern Regions

This ever-popular berry has stood the test for 25 years. Fruit large, and holds its size well throughout ripening season. Foliage smooth, bright and clean. A good plant maker. One of the most extensively planted early varieties of strawberries at this time. A perfect flowering, early ripening variety.

There are but very few varieties that have equalled Premier's production record. In flavor and quality it ranks with the best. **Recommended for home use, local sales or commercial markets.**

Blakemore

Blakemore

The Ideal Early Shipping Berry—We Offer a Special Strain of Blakemore, Free from Yellows

A healthy plant that yields big crops of berries—a factor worthy of note. Will stand 2 or 3 days without over-ripening.

Foliage is healthy and stands up well during drought. Fruit is firm, of good color and unexcelled as a long-distance shipping berry. Ranks high in productivity. To get all that you are entitled to from Blakemore, do not allow them to mat too thick in the rows during the growing season.

**BUNTINGS'
HOME GARDEN
STRAWBERRY
COLLECTION**

Have Strawberries fresh from your garden all season with this big value offer. In this variety list for your home garden, we have selected outstanding varieties covering the entire fruiting season—**Fairfax**, early; **Starbright**, medium early through midseason; **Ambrosia**, late; and **Mastodon**, the **best everbearer** or all-season variety.

QUALITY is Never Sacrificed for Low Price
yet **BARGAINS** are many at **BUNTINGS'**

Sodus Purple

A cross between a Red and Black Raspberry. Heaviest yielding and the most promising new large purple Raspberry. Sodus withstands drought and heat; comes through with a crop under adverse weather conditions. Does not crumble. Very large, attractive purple berries, of good quality. Canners prefer them over either red or black sorts.

A booklet containing complete planting and cultural directions for all trees and plants offered in this catalog will be included free with each order upon request.

SPLENDID WELL-ROOTED PLANTS—

A Local Market—No Outside Competition

You can make money with raspberries because their delicate flavor won't keep, and the berries can't be shipped long distances. This gives you all the Local Market, with little competition from outsiders—and a chance to sell on a quality basis alone. Raspberries usually sell from 18c to 25c a pint, often bring from \$800 to \$1000 per acre. For early summer cash the farmers are finding that Raspberries always find a ready sale and readily sell on the fruit stands.

Plant Buntings' Well-Developed Raspberry Bushes That Are Noted For Their Splendid Root Systems.

Latham

**Is All Meat—
Not All Seeds**

Latham is free from insects and diseases and multiplies rapidly. In the northwest, the great berry-growing section of America, growers are more enthusiastic over Latham and are planting it heavily each year. The most popular mid-season to late red Raspberry grown today. Very hardy; cold weather seems to have no effect on its bearing ability. Very large size, fine color; they start ripening in midseason and continue an unbelievably long time. Plants are vigorous growers; mosaic free.

Newburgh

**Ripens Ahead
of Latham**

(Red.) Midseason. A new variety introduced by the New York Fruit Testing Association. Plant vigorous grower, branching more than most red varieties. Hardy, very productive. Fruit very large, firm. Does not crumble. Precedes Latham a few days in ripening. An excellent shipper and keeper.

	RASPBERRY PRICES									
	GIANT SIZE			HEAVY No. 1 PLANTS

Taylor	1.25	2.50	7.50	.90	1.60	4.70	11.85	29.40		

CHIEF. (Red.) Ripens ten days earlier than Latham. Very hardy, can be grown successfully in cold climates. Fruit is firm and of fine flavor. Unusually healthy and vigorous. Chief is mosaic-proof and will not take on mildew.

TAYLOR. This new red Raspberry promises to be the best of them all for New York and the northern states. The plants are vigorous, hardy, productive, tall growing, and increase rapidly. Sturdy canes hold the berries well off the ground. The berries ripen shortly before Latham, are large, long-conic, bright attractive red, thick-fleshed, firm, sub-acid, and of excellent quality.

ST. REGIS EVERBEARER. Ripens with the earliest and continues on young canes until autumn. Color red; flesh firm and meaty. Largely planted.

Indian Summer

—Red Giant Everbearer

The best Everbearing Red Raspberry. Earliest to ripen; bears a full crop in June and an immense crop in the fall. A sensation because of its size, flavor, and unusual beauty. Wonderful keeping qualities. Berries are glossy red, conical in shape, and of extra large size. The greatest all-purpose Raspberry. The fall crops, when Raspberries are scarce and therefore highly prized, are heavier than the earlier ones.

PLANT THE GIANT SIZE

Ideal for home gardeners, and for commercial planters desiring quick returns on their investment. Our Giant Size Raspberries will bear fruit the following growing season if planted in early spring.

CUMBERLAND

Strong Sturdy Canes

In blacks—your best bet. Produces large, jet black fruit, firm and of excellent quality; sweet and mild, ripening in midseason and continuing for 2 weeks. Extensively planted for commercial purposes and for table use.

Fruit is large, plump and juicy, with a true "Blackcap Flavor" all its own. Free from seediness and crumbling, with extremely firm texture, which makes Cumberland an ideal shipper. No Black Raspberry has ever been grown as extensively as Cumberland, nor attained its great popularity in all Raspberry-producing sections of the country.

**BUNTINGS' DIRECT-TO-YOU LOW PRICES.
ALL SELECTED BIG - ROOTED SPECIMENS.**

Buntings' Hardy Grapes

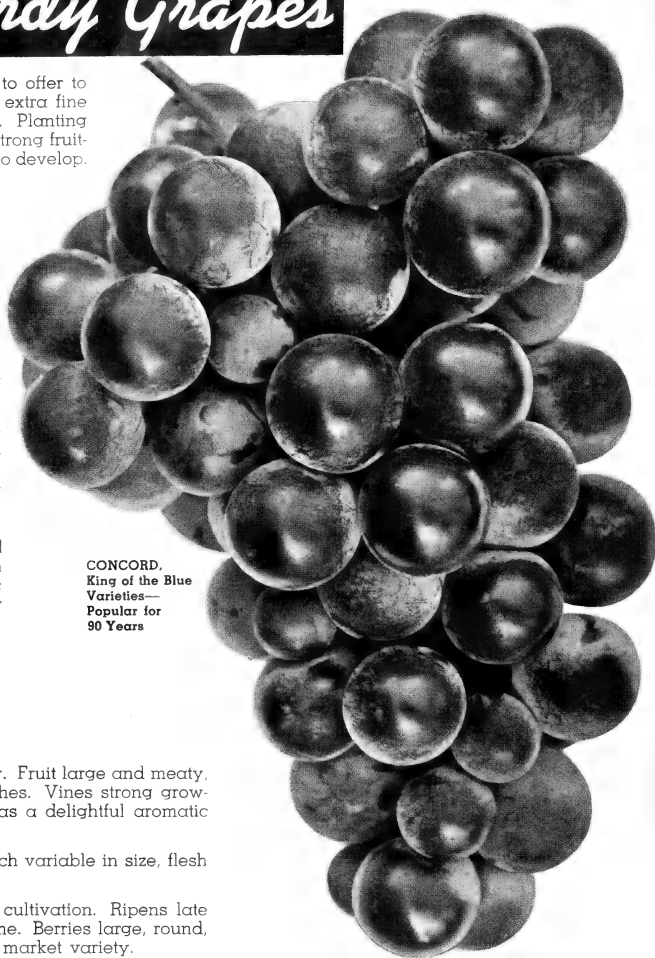

We are exceedingly fortunate in being able to offer to our patrons this spring very low prices on our extra fine long-rooted grape vines, for immediate results. Planting these vines, with their heavy root systems and strong fruiting canes, saves you needless waiting for them to develop.

CONCORD

A Universal Favorite for 90 Years

Discovered about 90 years ago. Apparently a seedling of a wild grape. It early established the record of being the "grape for the millions"—the KING of the grape family. It is still the best all-around grape. Its adaptability to varying climatic conditions alone makes it popular, to say nothing of what can be made of its fruit, such as sweet grape juice, jellies, jam, marmalades, etc.

Concord is a very vigorous grower, hardy and very productive. Ripens midseason and known as the best money-making commercial variety; also, for home use, it is unsurpassed by any other variety.

CONCORD,
King of the Blue
Varieties—
Popular for
90 Years

AGAWAM. Deep red or maroon. Ripens early. Fruit large and meaty, borne in extra large, loose-shouldered bunches. Vines strong growers, very healthy. Ripens with Concord. Has a delightful aromatic flavor.

BRIGHTON. One of the best red varieties; bunch variable in size, flesh tender and juicy, red; early.

CATAWBA. Keeps better than any Grape in cultivation. Ripens late and can be kept in good condition a long time. Berries large, round, when fully ripe dark copper colored. Good market variety.

CHAMPAGNE. The Champagne grape vine produces big bunches of sweet, amber-colored fruit. Very hardy and productive.

DELAWARE. Early. Vine moderately healthy and vigorous. Bunch small but compact, berries small to medium in size, red in color and of excellent flavor.

FREDONIA. Black, with heavy bloom, cluster about medium, berry large, very early, good quality; new and very promising.

MOORE'S EARLY. Ripens before Concord. Color of grapes deep black. Large and of best quality. Bunches hold together firmly. One of the best shippers. A profitable variety for either home use or market. Makes excellent wine. Very productive. Like Concord and Worden produces abundantly in nursery row on two-year-old vines.

MOORE'S DIAMOND. White. Ripens early September. Berries medium size, and desirable for grape juice. Good quality fruit.

PORTLAND. White, very early, cluster medium large, berry good quality. Very hardy, vigorous grower, productive. New and very promising.

WORDEN. Vine moderate grower, very hardy and productive. Grapes very large, thin skin, very fine flavor, blue-black in color and fine for home use or nearby market. One of the earliest, ripening about 10 days before Concord. Fruits heavily on young vines.

A small sum invested in vigorous Bunting-grown vines
turns your idle land into fruitfulness and value

Grapes Popular Tested Varieties

Grapes can be grown on many types of soil from light blow sand to heavy clay. They can be grown on hillsides, along boundary lines, or on arbors and trellises.

Buntings' offer only strong one- and two-year old plants, grown in our own nurseries at Selbyville.

Plant Buntings' high quality vines and be assured of success. Plant eight to ten feet apart. Shipped direct from our nurseries to you.

NIAGARA — A Quality White Grape

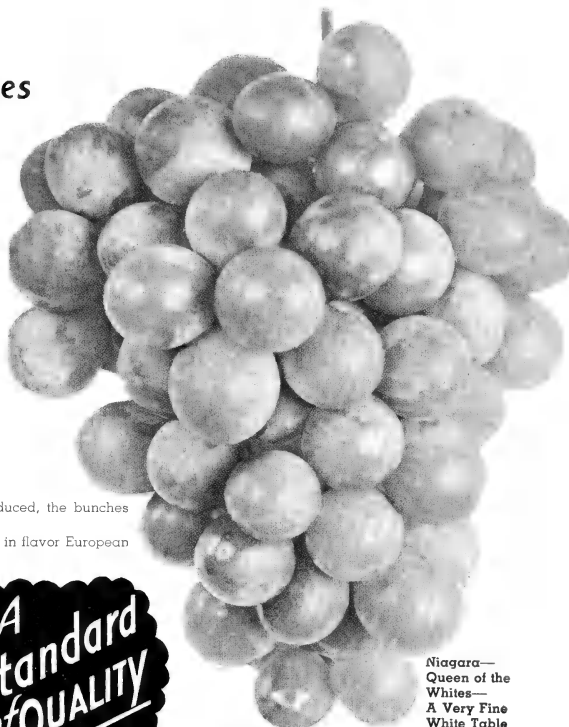

Was first fruited in 1868. Concord is one of its parents. It received practically all of its characteristics from this parent. Niagara, therefore, is Queen of the Grape family. Where well grown, its bunch, berry and coloring cannot be surpassed in beauty. It has been and still is the standard white table grape of eastern United States. It does not easily crack. Consequently it makes a very good appearance on the market, inducing larger sales. The fruit of Niagara is at its best when left on the vines until well ripened. **Niagara is a worthy Queen of King Concord.**

CACO — The Best Red

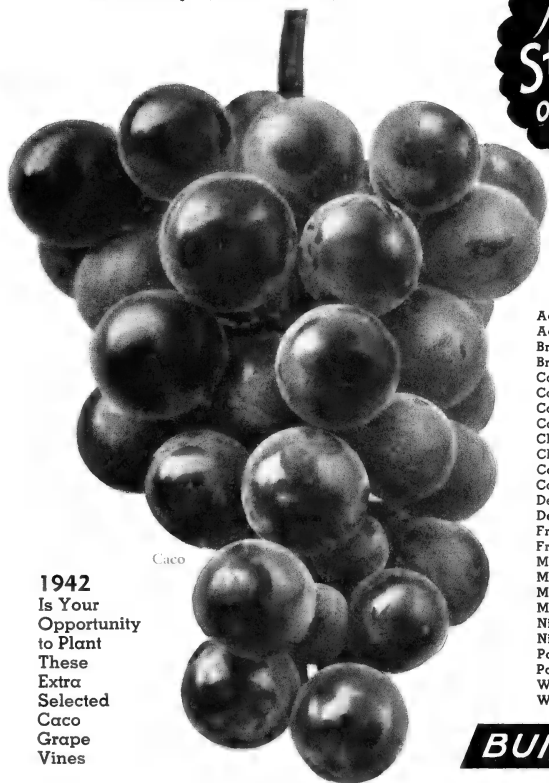

This is a variety considered the best and hardest amber-red ever produced, the bunches being very large and the berries comparable with the new Fredonia.

In quality Caco ranks among the best of the native grapes, approaching in flavor European Muscat rather than the foxiness of native grapes.

For three of the best varieties we recommend Concord, dark blue-black: Niagara, white; and Caco, red.

BUNTING GROWN they are HARDY

The Mammoth BOYSENBERRY • $1\frac{1}{2}$ " Long 1" Wide

10 PLANTS for \$1.20

The biggest berry ever developed. Its size is unbelievable—two inches long is not unusual, three inches long not rare. Fifty of these plump, inch-thick marvels will fill a quart basket; a sight so remarkable people can't resist buying them! They are rare—they are unusual. The demand is so tremendous retailers can't get enough of such perfect fruit.

A cross between the California Loganberry, Raspberry and Blackberry. Just think of a berry that has a little of each of these fruits all in one giant, nearly seedless, beautiful wine-colored berry, with a flavor that you will never forget. Get in on this wide-open market and make money.

Buntings' hardy No. 1 strong-rooted plants bear big crops the second year. Do not miss planting some Boysenberries in your Defense Garden this year.

Profitable to Grow. Whether you are growing berries for market or just a few in your garden, it will pay you to get started right now. Twenty-five plants will produce an abundance of fruit for the average family. Nine hundred plants will set an acre, set 7 ft. by 7 ft.

Boysenberry No. 1 strong-rooted plants.
5 for 80c; 10 for \$1.20; 25 for \$2.20; 50 for \$3.70; 100 for \$6.50; 300 for \$16.20; 1000 for \$40.00.

Fifty Boysenberries Often Fill a Quart Box.

3 yr., 18-24"	1.50	1.30	1.15

There is a big market for these delicious Blueberries; they make money from any type of acid soil. Grow in big clusters—3000 to 5000 quarts per acre—easy to harvest, thornless. Plants last a lifetime, give bigger yields every year.

If your soil is sweet, use peat moss or partially rotted vegetable matter around the plants to create acid. The period of ripening covers several weeks; therefore harvesting can be done at leisure. Write the U. S. Dept. of Agriculture, Washington, D. C., for free booklet on Blueberry culture.

Your choice of **Cabot**, early; **Rancocas**, mid-season; **Rubel**, late. Use two or more varieties to cross-pollenate for best results.

Plums

Hardy Sorts

Most prolific of all fruits—1 tree will yield up to 50 gallons big, soft flesh, delicious plums.

Buntings' extra heavy, 2-year trees grow with little care.

ABUNDANCE. (Asiatic.) Fruit very large and showy; flesh light yellow, exceedingly juicy, tender and sweet. A good market variety. Ripens the first of August.

BURBANK. (Asiatic.) Fruit very large; dark violet-red; flesh juicy and pleasant. Ripens middle of August. Productive.

GERMAN PRUNE. Dark purple or blue; juicy, rich, of best quality. September.

RED JUNE. (Asiatic.) Ripens first of August. Fruit large, red; flesh light lemon-yellow, half cling, slightly subacid and of good quality. Very productive.

FELLENBERG. (Italian Prune.) Flesh juicy and delicious. Dark purple with a dark blue bloom; medium size. September.

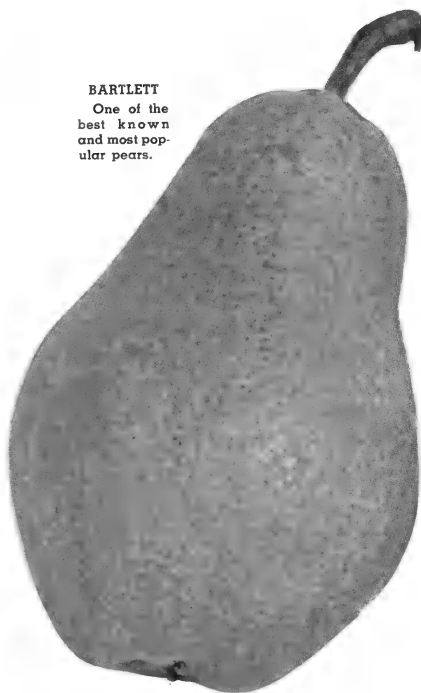

SHROPSHIRE, DAMSON. Medium size fruit, produced in thick clusters or groups. Tree a strong grower and very productive of dark purple-colored plums. October.

Fellenberg (Italian Prune)

BARTLETT
One of the
best known
and most pop-
ular pears.

BUNTINGS' SUPERIOR PEAR TREES

Bartlett

Unexcelled for Canning, Pickling and Eating—It is the All-Around Favorite Pear

Bartlett, the standard on all markets. Large, rich golden yellow with red blush; juicy, melting, with rich indescribable flavor that has made it the most popular flavored pear. An old favorite.

Clapp's Favorite

Summer. Fruit large, lemon color, spotted with brown dots; flesh fine, rich and sweet. A very good one. Early August.

Seckel For Pickling

Medium size, skin rich yellowish brown with deep brownish red cheek when fully ripe; flesh very fine grained, sweet, exceedingly juicy, melting, buttery. One of the richest and highest flavored Pears known. September.

Kieffer

Rich Golden Yellow—Widely Planted

Prolific. Abundant and regular bearer. Good shipper. Fruit large, color yellow with red cheek. Will produce ten bushels of pears to the tree when ten years old; begins fruiting successfully when three years old. October.

These Prices Do Not Apply to Hardee, Redelberta, or O'Boy.

Standard PEACH TREES *the Pick of them all*

BELLE OF GEORGIA. Ripens the 1st to 5th of August. Fruit is large, white with red cheek; flesh white, firm, of excellent flavor. Tree a rapid grower and very productive. One of the very best market sorts. Freestone.

BERK'S FAVORITE. Freestone. Ripens September 15th to 20th; size large, skin white with red cheek; flesh white; a good cropper and unexcelled shipper.

BRACKETT. Follows Elberta in ripening. Size large to very large. Orange-yellow skin tinted with carmine. Flesh is deep yellow. Very highly flavored. A very good one for home use and extensively planted in commercial orchards. Freestone.

CARMAN. A very hardy, semi-freestone Peach, ripening about the middle of July; skin pale yellow with blush on sunny side; flesh white, tender, sweet and melting. Ships well. Best early market Peach.

CRAWFORD'S EARLY. Freestone. Large, oblong, yellow with deep red cheek; flesh yellow; juicy and rich; excellent flavor. August 1st to 15th.

CRAWFORD'S LATE. Ripens after Elberta. Freestone. High quality and very large size; flesh deep yellow; skin yellow with a broad dark red cheek.

CUMBERLAND. Semi-freestone. A cross between Belle and Greensboro. Fruit above medium in size, attractive in color. Good quality.

EARLY ELBERTA. Very similar in both foliage and fruit to the old reliable Elberta. Ripens a week before this well-known variety.

ECLIPSE. Freestone. Large dark red, yellow-fleshed with good flavor, ripening in July. Excellent shipper and good variety to replace Hiley.

GOLDEN JUBILEE. Ripe 4 weeks before Elberta. An outstanding, comparatively new variety. Never has failed to bring high prices. Already in extensive production. Very hardy. Resists excessive cold. A sure cropper after severe winters and heavy frosts at blooming period. A large early yellow freestone flushed with flaming red; flesh yellow, tender, juicy and sweet. Similar in general appearance to Elberta.

GREENSBORO. Semi-cling. Ripens from June 25th to July 10th. Large, white with a red cheek. Flesh white, rich and juicy. Tree a strong grower.

HILEY. Ripens about a week before the Belle of Georgia; also a seedling of the Belle. Tree very hardy. A large creamy white Peach with rich blush; flesh white. Freestone.

IRON MOUNTAIN. Ripens September 1st. White, freestone. Fruit is of large size, color white, good quality.

J. H. HALE. Freestone. One of the best sorts for market or garden. Fruit is very large, round, yellow, sweet and melting; quality excellent. Skin yellow, finely colored. Ripens just before the Elberta. A very good one.

KRUMMEL. Freestone. Season of ripening in Delaware about September 10th to 20th. Fruit quite large, fine flavor, skin yellow splashed with red. Fine for canning or preserving.

MAYFLOWER. Very early red. Hardy. Cling.

RED BIRD CLING. (Early Wheeler). Very early, white, cling, extra large with a bright red blush; an excellent shipper.

ROBERTA. Yellow; freestone; ripens about 10 days after Elberta, which variety it resembles very closely. A new variety which fruit growers are planting extensively. Ripens at a time to bring good prices.

ROCHESTER. Has the habits and characteristics of the Crawford, but fully two weeks earlier. Yellow; freestone; good size; very sweet, fine flavor. Requires only half the usual amount of sugar for canning. Ripens middle July.

SALBERTA. Late. Large yellow freestone. Ripens about one week after Roberta.

The young four-year-old orchard illustrated below is proof of the quality of Buntings' Peach Trees.

STANDARD PEACH TREES

SLAPPEY. Freestone. Yellow flesh, medium to large size.

SHIPPER'S LATE RED. Follows Elberta in ripening. Skin yellow with attractive red coloring. Flesh yellow, juicy, sweet, pleasing flavor. Bears young; good late commercial variety. Freestone.

SOUTH HAVEN. Early, freestone. Large, deep yellow with red cheek. Heavy bearer. One of the best paying varieties for commercial orchards. Comparatively new, but tried and tested in a commercial way for several years.

VEDETTE. Freestone. Ripens a few days before Valiant. Fruit is large, roundish oval, yellow flesh. Ripens three weeks before Elberta.

VALIANT. Freestone. Fruit large, yellow blushed with red, with firm, juicy flesh of very good quality. Ripens about two weeks ahead of Elberta.

WHITE HEATH CLING. Ripens September 10th to 15th. Fruit extra large, roundish; flesh white, exceedingly juicy.

See prices on page 26 for above varieties.

REDELBERTA

Plant Patent
No. 232)

A Double Red Elberta that Ripens 10 Days Earlier

The old reliable Elberta with all its good characteristics retained **PLUS** bright red color 10 days earlier.

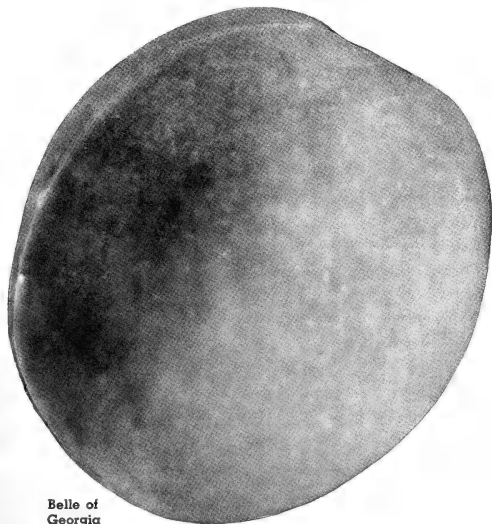

This Peach is identical with Elberta in tree and fruit, except that the fruit ripens approximately 10 days earlier than common Elberta and has fully double the red color of that variety.

For the profitable earlier markets, you can't beat Redelberta. With its early red color and earlier picking season, it can be shipped firm ripe. For generations Elberta has been the standard commercial Peach variety by which all other varieties have been judged, and now Dame Nature has given us an improvement on it. A bud sport or mutation, originating in the orchard of Mr. Jay Perry, Kennewick, Washington.

Belle of
Georgia

Golden
Jubilee

Peaches *Bear Heavily* in three or four years

Peaches are divided into white flesh sorts and yellow flesh sorts. The former are the earliest in the season, juiciest, and sweetest, but very few markets prefer them to yellow peaches. The latter, however, are firmer, ship better, and are better liked in a great majority of markets.

Another division of peaches may be made, clingstone and freestone. The clingstones are earlier and as a class are not as well flavored as the freestones. They are preferred by many for culinary purposes since they hold their shape better after cooking. For home use we recommend planting liberally of both the white and yellow flesh varieties, including, of course, some clingstones.

The peach will thrive upon a great diversity of soil, provided one condition be ever present—good drainage.

Buntings' Healthy, Well-Grown, Vigorous Trees Are Worth More

Quality in Peach trees is not a mere matter of the size of the trees at the time of purchase. It includes the horticultural skill, knowledge, care and personal integrity actually employed from the securing of the Peach seed to the delivery of the stock.

Tried and Tested in Our Own Orchards

Considering our long experience in Peach tree production, the knowledge we have obtained in watching the trees in our bearing commercial orchards here in Sussex County, it is our belief that you cannot buy better Peach trees anywhere in the country regardless of price.

PRICES. The prices we are charging for our trees are as reasonable as we can make when considering extra quality of the stock.

Hale-Haven

A Premium Peach for Every Commercial Orchard. Ripe 2 Weeks Before Elberta.

Steadily gaining favor, because of its size, color, good shipping qualities and hardness in bud.

This marvelous new peach, an introduction of the Michigan State Experiment Station, is a cross between the famous South Haven and J. H. Hale. It's an aristocrat of the first order.

Extremely high color before ripening; withstands cold temperatures; very hardy; heavy bearer. A perfect freestone, yellow fleshed.

Prices, see page 26.

Elberta

We grow
the original
strain

Still
the KING
of Peaches

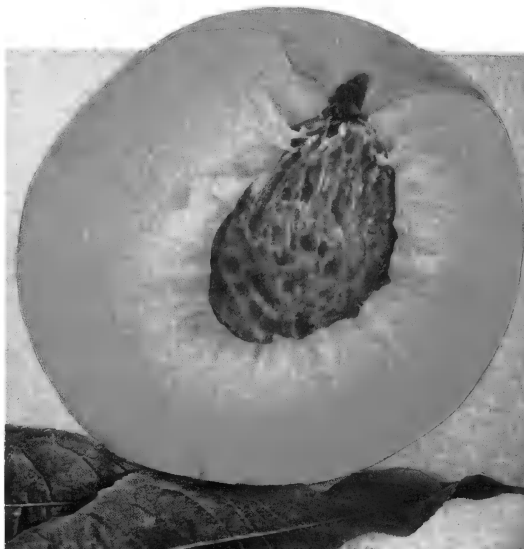

Elberta leads all other peaches in number of trees in America. It is, too, the most popular of all peaches in the markets. The pre-eminent meritorious character of Elberta is its freedom from local prejudices of extra soil or climate—it is the cosmopolite of cultivated peaches, thus Elberta is grown with profit in every peach-growing state in the Union.

Fruit Matures in Mid-Season

3 inches long and 2 3/4 inches wide, roundish, with a pointed tip and skin thick, flesh yellow stained pink near the pit, juicy, firm but tender, good quality, stone free.

See top of page 26 for prices.

HARDEE

It Withstands Severe Winters

U. S. Plant Patent 120

**A New Peach Cultivated to Resist
Excessive Cold**

**Produces Peaches and Lots of Them
When Other Trees Fail**

The Hardee Peach is a freestone, firm, yellow flesh, Elberta type, a good shipper, with a tendency to attain a slightly larger size than Elberta, and with a somewhat thicker skin. It produces good Peaches and lots of them when other varieties are winter-killed; thus it will make profits for you when the common sorts fail and when prices are highest.

CERTIFIED FRUIT TREES

Our fruit trees are certified for truthness to name by ourselves, and we have been in the fruit growing business (as well as producers of trees) for more than thirty years. Also, each year, they are inspected for truthness to name by the staff of Dr. J. K. Shaw, Research Professor of Pomology, Massachusetts State College, and by Dr. W. H. Upshall of the Vineland, Ontario, Canada, Experimental Station, both of whom are recognized authorities on fruit variety certification. Every precaution is taken to assure you of getting the variety ordered.

O'Boy
Peach

O'Boy

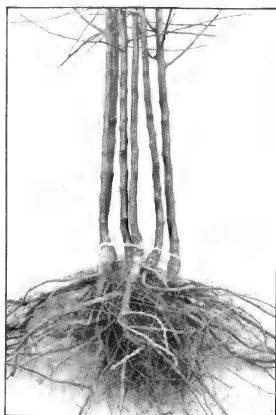

THE PERFECT PEACH

If you are looking for the largest, richest, most beautiful Peach in the world, here it is! Everyone who sees it exclaims in wonder, "O'Boy, what a perfect Peach." So it was named O'Boy. It is round and uniformly shaped. Skin is glowing orange, blushed all over with rich, dark red, even before ripe. The flesh is rich orange, bright red around the pit. The peach-red color is retained in the canned fruit and juice.

Firm of flesh and skin, O'Boy Peaches hold up under adverse weather and long-distance shipping, even in warm weather. You'll want to can them exclusively for your fancy table use. They are perfectly freestone and self-pollenizing. Bear heavily when three years old. Don't fail to plant O'Boy this spring.

ROOT GROWTH

It's the Bunting Story of Better Trees

This photograph was made to give our customers some idea of the root system of our fruit trees, also straight sturdy trunks. Trees of this type transplant well, bear fruit early.

APPLE TREES

Roots

Buntings' Trees are grown to make sure they can be transplanted successfully without setback to their growing and bearing power. By our method of spacing in the nursery, heavy fibrous roots are formed, the wood is hardened and the fruit spurs started. This means you get a true-to-name, trained and developed tree to take hold quickly in any location, a tree that is far superior in vigor and fruitfulness.

STANDARD APPLE VARIETIES

ALBEMARLE PIPPIN. Yellow, medium in size, with tender, crisp, juicy flesh. Excellent quality, late keeper.

ANOKA. Often called the Old Folks Apple because it bears so quickly after planted. Medium size red and green striped summer apple.

SOLID-RED DELICIOUS. The leader of all Red Apples. Our own selected sport of this famous variety. An excellent apple for either home use or market. Same characteristics as its parent, except for its double red color three weeks earlier.

SOLID-RED DUCHESS. Sport of Duchess. Fruit is large, symmetrical, skin moderately thick, flesh yellowish white, firm, juicy and sub-acid.

EARLY HARVEST. Medium to large. Pale yellow. Tender with a mild fine flavor. One of the first to ripen.

EARLY MCINTOSH. Summer. Holds same prominent qualities as the winter McIntosh. Flesh white, tender, juicy and fine flavor.

DOUBLE-RED GRAVENSTEIN. Flesh yellowish, acid, aromatic. Much better color than the original Gravenstein.

GRIMES GOLDEN. Very large, skin golden yellow, flesh tender and crisp. A very good fall apple. Grown in all sections of the country.

DOUBLE-RED JONATHAN. Insure your profits from Jonathan by planting this new red sport that will give you bright red-colored fruit about two weeks earlier. Fruit medium to large, brilliant red, juicy, fine grain, tender and very highly flavored. Bears young; produces heavy crops every year.

LOWRY. Very juicy, slightly sub-acid, of mahogany-red color; a medium heavy bearer and a sure one.

MACOUN. A cross between McIntosh and Jersey Black. Shape of the fruit is similar to that of McIntosh; color is darker red with less stripe; flesh is much the same color, texture, flavor and aroma as McIntosh.

SOLID-RED MCINTOSH. A selected bright red sport of the reliable old McIntosh. Medium size, flesh white, tender, juicy, sub-acid. Tree hardy, vigorous and healthy.

MILTON. A McIntosh-like apple, ripening a month before McIntosh. Tree hardy, vigorous and an annual bearer. The fruit is pinkish red with a heavy bloom, most beautiful. Flesh white, tender, crisp, juicy.

It will pay you Better

To Buy Buntings' Fruit Trees. There is no economy in planting very young trees just because they are cheap. You cannot afford several years waiting to see what will happen. Make sure of results by setting Buntings' Selected Trees.

Bunting Grown *Choice Specimens* for *Quick Results*

Standard Apple Trees

RED NORTHERN SPY. Flesh juicy, rich, crisp, aromatic, of good flavor. Our own selected sport of this popular northern apple.

NORTHWESTERN GREENING. Fruit large, green, becoming yellowish green when ripe. Flesh yellow, fine-grained and firm.

RED ASTRACHAN. Large, roundish, nearly covered with deep crimson. Juicy, rich acid fruit. A good bearer.

RHODE ISLAND GREENING. Rich acid flavor, tender and juicy; yellow in color, sometimes having a red cheek. Very delicious.

SMOKEHOUSE. Winter. Fruit medium to large, uniform size and shape. Color yellow or greenish, mottled with rather dark red.

SOLID RED ROME. Noted for Productiveness and Red Coloring. A brilliant, solid red that produces over 50 per cent more extra fancy apples for color grade than common Rome Beauty. A beautiful apple identical in quality, productiveness and other characteristics with the regular Rome, except for a greatly superior color. We can supply either Gallia Beauty or Cox's strain of Red Rome Beauty. The apples are similar in color but the Cox's strain will average larger in size and will keep better in storage.

STARR. Large, yellowish, smooth skin; sometimes marked with a faint blush and russet dots. Flesh yellow, very tender, crisp, juicy.

SUMMER RAMBO. Large, yellowish green splashed with red. Crisp and tender.

TWENTY OUNCE. Large. Excellent cooking and baking apple.

WEALTHY. Fall. Almost solid red. Flesh white, tender, crisp, juicy, fine grained. A good keeper.

WILLIAMS EARLY RED. Among the earliest to ripen and the largest of all early apples. Flesh is white and slightly tart.

WILLOWTWIG. Winter. Rather early, and regular bearer. Medium to large, light red apple, of good quality.

WINESAP. Medium to large size. Red color, flesh yellow, firm, crisp, with rich flavor; good quality.

WOLF RIVER. Large, handsome, bright yellow skin, mottled with deep red and broad stripes of bright carmine.

YELLOW TRANSPARENT. Fruit medium to large, with a brilliant waxy skin; flesh is tender, crisp, and juicy; color yellow. Ripens in July.

CRAB APPLES

RED SIBERIAN. Large, round, brilliant red on a pale yellow background. Flesh acid and greatly esteemed for preserves and jellies.

TRANSCENDENT. Fruit large, round; skin smooth, rich yellow shaded with red. Flesh yellow, crisp and juicy.

WHITNEY. Fruit red striped, large, uniform in size. Skin smooth, glossy, yellow striped and splashed with carmine. Flesh firm and juicy.

HYSLOP. Large, handsome, crimson, splashed with dark red. Very prolific.

RED YORKING
TRADE MARK

U. S. Plant Patent No. 125

ORCHARDISTS,
HERE'S THE
APPLE THAT
WILL MAKE
HISTORY.

A sport from its famous daddy, York Imperial. It has the same fine and dependable qualities except that its skin is thicker, does not scald in storage, and it ripens to a solid cherry-red color.

Shows color 5 weeks earlier. An excellent shipping apple. Plant these early ripening Red Yorkings and get into the market with a sure profit-making new variety that finds a ready sale. Offered for the first time at regular standard prices. **See page 30 for prices.**

APPLE TREES • *Best Buys*

SHOTWELL
(U.S. PLANT PAT. NO. 90)
DELICIOUS

BIG Delicious Double Crimson Red—Large Size

This improved new Red Delicious colors a very rich red 3 to 4 days in advance of any other red strain of Delicious Apples.

Shotwell Delicious is not only a commercial apple, but it is every bit as well adapted to the home garden.

A superior, large, uniform apple, rich in flavor, with a characteristic 5-knob appearance that makes it attractive in every market.

BLACK-MACK
 Trade Mark Registered

Colors a Solid Deep Red Two Weeks Earlier

This is a strain of McIntosh which colors two weeks in advance of the regular variety. A solid deep red which can be picked in prime condition, which improves shipping and eating qualities and eliminates loss from windfalls.

BLACKJON
 Trade Mark Registered

It's Patented A Superior Deep Red Jonathan

This apple is the same as the common Jonathan in flavor, quality and productiveness. It is different from the common Jonathan in that it attains an intense bright red color from two to three weeks earlier and can be picked while hard ripe. Those who like a crisp, juicy Jonathan with a beautiful deep cherry-red color can be sure of getting it in the Blackjon.

Superior Bunting Apples

Double Red Stayman Winesap

Carries at least double the color of the original strain of Stayman Winesap; otherwise exactly the same in growth, hardness, etc. We have discontinued propagating in our nurseries, also growing in our orchards, the regular variety of Stayman Winesap, in view of the fact that we get the same quality in Double-Red Stayman with double the color which sells the fruit for more money.

See page 30 for prices on Double-Red Stayman Winesap, and Yellow Delicious.

Double-Red
Stayman
Winesap

Yellow Delicious *It's Golden with Flushed Cheek*

This alluring apple with the strong appetite appeal never fails to capture the elusive nickel on the fruit stands.

It is a national favorite, commanding highest prices on the market.

Multiple FRUIT TREES

Pick several varieties of fruit from one tree. Especially developed for the small garden where space is limited.

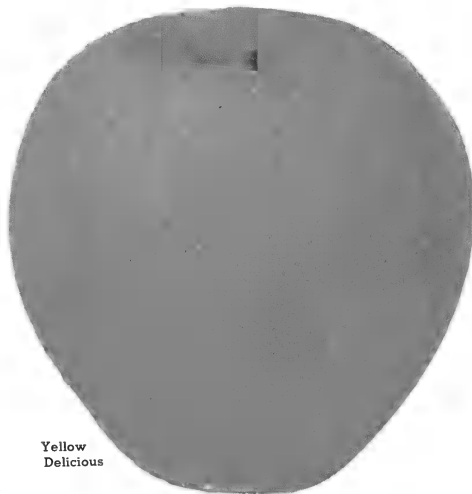

All Combination or Multiple Trees, No. 1, 2-year-old trees, \$1.50 each.

5-N-1 Plum (Abundance, Bradshaw, Burbank, Red June and Wickson varieties on each tree).

3-N-1 Cherry (Montmorency, Black Tartarian and Yellow Spanish).

3-N-1 Pear (Bartlett, Kieffer and Garber).

TRIPLET TREE (Hale Haven Peach, Abundance Plum and Early Golden Apricot).

Yellow
Delicious

Quintuplet Apple

FIVE Leading Varieties on ONE TREE

The Famous "5-N-1"

Here's the opportunity for those with limited space to have five mighty desirable varieties of Apples, all budded on one tree, for a little more than the cost of one tree. Requires only a 25-foot space when fully grown.

Each tree is budded to Yellow Transparent for first early; Anoka for second early, Red Jonathan, Red Delicious and Yellow Delicious for fall and winter.

Price: No. 1, 2-year-old trees, \$1.50 each.

Leading orchardists are more enthusiastic than ever over Buntings' "Double-Red Apples." They are the varieties that sell at good prices on all markets.

BLACK BERRIES • HARDY VIGOROUS DEPENDABLE

Increase your profit! One acre of blackberries will average 800 to 2000 quarts, and prices on this fruit are always high. Plant Blackberries along trenches and the lot lines, and turn waste garden space into profit. Excellent for home and market use.

Blackberry prices, No. 1 plants: 10 for 80c; 25 for \$1.50; 100 for \$4.35; 1000 for \$26.75.

FIELD CULTURE

Plant in rows 7 feet apart with plants set 4 feet apart in the rows (1,555 plants to set an acre at given distances).

Plow a furrow about 5 or 6 inches deep or dig holes 6 inches deep and 6 inches square. Spread roots, fill hole with soil; firm well. Cut stock after planting approximately 2 inches above ground level. Let them grow and the following spring cut the new growth back one-third, leaving two-thirds of the season's growth for production of berries. After they have fruited cut all fruiting canes out and burn them. Cultivate occasionally and follow same procedure each year, allowing about 6 to 10 canes on each plant to stand for fruiting each season.

BLOWERS. Buntings' plants are the heaviest fruiting and best Blackberries in the world. Very hardy, the berries are sweet and delicious, jet black color, good shippers, ripen in July.

ELDORADO. Another fine quality Blackberry. Plants are vigorous and seldom fail to produce a bumper crop. Commercial growers like their shipping qualities.

The Big Blowers Blackberry

Currants - Gooseberries

CURRENTS

FAY'S PROLIFIC. A very vigorous growing bush, enormously productive, with fruits of very large size. Inclined to do better on light soils than most varieties. Popular with most growers, but not as upright a grower as Wilder. 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

WILDER. A vigorous, upright growing bush. Very hardy and productive. This variety is possibly more largely grown than any other kind in cultivation. It was highly commended by that great Currant authority, the late S. D. Willard, of Geneva, N. Y. Berries medium to large, dark glossy red; skin thin, tender; flesh juicy, firm, exceedingly good; late midseason. 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

GOOSEBERRIES

DOWNING. One of the old reliable varieties. Fruit is quite large, pale green in color, and of splendid quality. Bushes are vigorous growers. Midseason.

HOUGHTON. This variety rarely fails to produce a crop every year. The berries are of medium size, sweet and tender, and the plants are extremely hardy and healthy.

Price, 2-yr., No. 1 plants, 35c each; 10 for \$3.00; 100 for \$25.00.

23 States Require Permit

Under provisions of the White Pine Blister-Rust Quarantine, it is unlawful for anyone to send Currants or Gooseberries into 23 States of the Union without first securing a special permit from the State Department of Agriculture where the shipment is to be made. Therefore, please do not request "rush" shipments on orders for these plants, as it sometimes requires ten days to secure a permit.

DEWBERRIES

Produced on a trailing vine, does best when supported on a wire. Berries extra large, long, glittery black. Big profits when grown commercially. Hardy and disease resistant, early ripening varieties. Order now and plant on time. Buntings' guaranteed nursery stock conforms to all standards of the American Association of Nurserymen.

AUSTIN. Ripens before Lucretia. A valuable variety for table use. Fruit very large.

LUCRETIA. Extremely productive. Berries extra large, black in color; flavor rich, sweet and delicious.

Dewberry prices, No. 1 plants: 10 for 70c; 25 for \$1.25; 100 for \$3.50; 1000 for \$18.00.

ALEXANDER. Fruit large, yellow flecked with red.

MOORPARK. Orange-yellow fruit with red cheeks.

Alexander Apricots

A booklet containing complete planting and cultural directions for all trees and plants offered in this catalog will be included free with each order upon request.

Sweet September Cherry

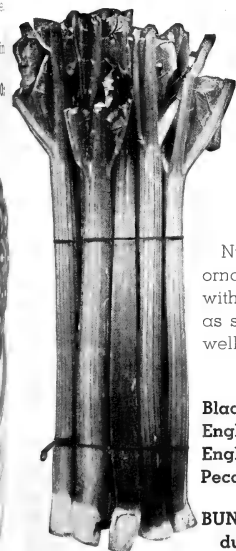

(Plant Pat. No. 94)

The amazing new fall-bearing Cherry. Produces deliciously sweet cherries, medium dark red, large size fruit, which ripen about September 1st. The young trees start bearing the second or third year after planting, and continue producing heavy crops thereafter. **Strong, 3-4 ft. trees, \$1.60 each.**

Rhubarb or Pieplant

MCDONALD RHUBARB. You'll want some of this **Red Sweet Rhubarb.** The new seedless variety, grown from divisions. Outyields and takes less sugar than Myatt's Linnaeus. Mildly acid, bears stalks up to 2 feet tall, red all the way down. **Price: No. 1 divisions, 30c each; 3 for 80c; 10 for \$2.25.**

MYATT'S LINNAEUS RHUBARB. Early, large, tender and good quality. **Price: 2-yr. No. 1 plants, 10c each; 3 for 25c; 10 for 75c.**

Rhubarb

Nut Trees

Nut trees are valuable, useful and ornamental. No home should be without them. They are valuable as shade and ornamental trees, as well as for the nuts they produce.

	Each
Black Walnut, 5-6 ft.	\$2.25
English Walnut, 3-4 ft., grafted.	3.25
English Walnut, 4-5 ft., grafted.	4.25
Pecan, 5-6 feet, grafted	2.25

BUNTING'S Grafted Nut Trees Produce Nuts in Two or Three Years After Planting.

BLACK WALNUT. Widely known, very hardy. Trees grow to an immense size and bear heavy crops regularly. Nuts are delicious.

ENGLISH WALNUT. A fine, lofty growing tree with handsome spreading head. Very hardy, will stand extreme cold. Produces abundantly.

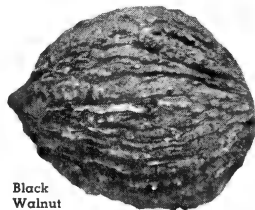

PECAN. Strong grower. Very large, thin-shelled nuts, easily opened.

The New Extra Hardy Manchurian Apricot

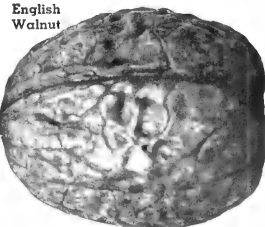

Put them on your "must" list. Particularly outstanding because of their ability to thrive and bear fruit almost anywhere in the U. S. A., thus extending the present Apricot belt to the Canadian border and even beyond. Have withstood temperatures of 50 below zero. Very drought resistant. They bear early, almost always in one or two years after planting. Fruit is of good size, freestone, good flavor. **Strong two-year trees, 60c each; \$5.50 per 10.**

Horseradish

MALINER KREN. Very hardy, and thrives best in cool, moist earth, but will thrive well on any soil that produces crops of any kind. Plants are vigorous, and roots grow to a large size. **Price, 1-yr., No. 1 plants: 10 for 50c; 25 for \$1.00; 100 for \$3.00.**

Black Walnut

English Walnut

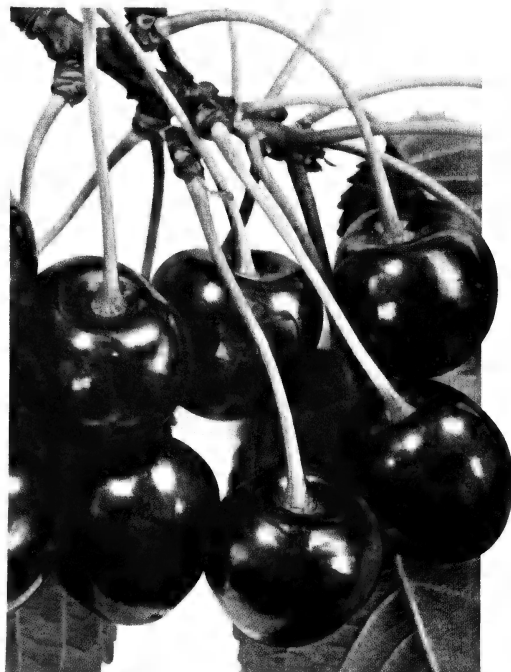

The Great MONTMORENCY

These select record-breaking Montmorency trees develop into uniform shapely specimens bearing heavy crops of very large fruit.

Fruit large, firm, ships perfectly. Bears very young, produces tremendous money-making crops and is successful everywhere.

Fruit Growers Consider This the Finest Sour Cherry In Cultivation

Because of its distinctive acid flavor, delightful in pies and preserves.

Black Tartarian

Cherries

Only
the Choice
Varieties

We do not believe in confusing our friends by listing too many varieties. Success will be yours if you confine your selection of cherry trees to any of the varieties listed below. They are preferred by experienced growers as amazing bearers of firm, juicy fruit that commands fancy prices.

Commercial orchardists: Write for prices on larger numbers.

ENGLISH MORELLO. Tree small, round-headed, with distinctly drooping branches. Fruit three-fourths of an inch in diameter, color dark red. Flavor tart, good quality; excellent for preserving and pies. Freestone. Ripens in July.

EARLY RICHMOND. A leading Sour Cherry, used extensively by canners, excellent for pies, and preserves. Tree medium size, dense, upright-spreading. Fruit three-fourths inch in diameter, color light red, fruit thin-skinned, freestone. Ripens in June.

Sweet Cherries

BLACK TARTARIAN

The Best Sweet Cherry

Here is the best, most dependable and widely successful of the sweet cherries. Its great heart-shaped fruits (rich, dark purple hue) look irresistibly tempting. The sweet, mild flavor and rich tang have won for it a nation-wide popularity both with commercial and home growers.

A Prime Market Favorite

For the big market trade hundreds of miles from orchards, the local fruit markets or fruit stands scattered all over the country, they offer a dependable yearly yield that is sure to bring profit to the grower.

YELLOW SPANISH. Ripens early in June. Fruit large, color yellow. Tree vigorous grower.

FRESH FROM YOUR GARDEN EVERY YEAR

ASPARAGUS

ABUNDANT VITAMIN CONTENT

MARY WASHINGTON

The Blue-Blood of the Asparagus World. Extra heavy crowns, long fat roots, strong, giant size, green color. Bunting-grown.

Originated by the U. S. Department of Agriculture and for years considered the best variety of Asparagus grown. All of the commercial growers are planting Washington exclusively. Very strong grower, stock of giant size, green color, rich and tender. It is our opinion that the two principal good points of this variety are, that it is rust-resistant, also a stronger grower than any of the old standards of Asparagus.

PRICES

	25	100	250	1000
1 yr. No. 1	\$0.65	\$1.40	\$2.70	\$7.25
2 yr. No. 185	1.90	3.45	9.00
GIANT SIZE, EXTRA HEAVY	1.15	2.70	4.85	15.00

We are the largest growers of Asparagus plants in America. The seed from which our plants are grown is selected from a pedigreed field; it is hand-picked from the sturdiest stalks in the field, assuring you of the best strain of Asparagus possible when you buy Buntings' plants. WRITE FOR SPECIAL PRICES ON LARGE LOTS.

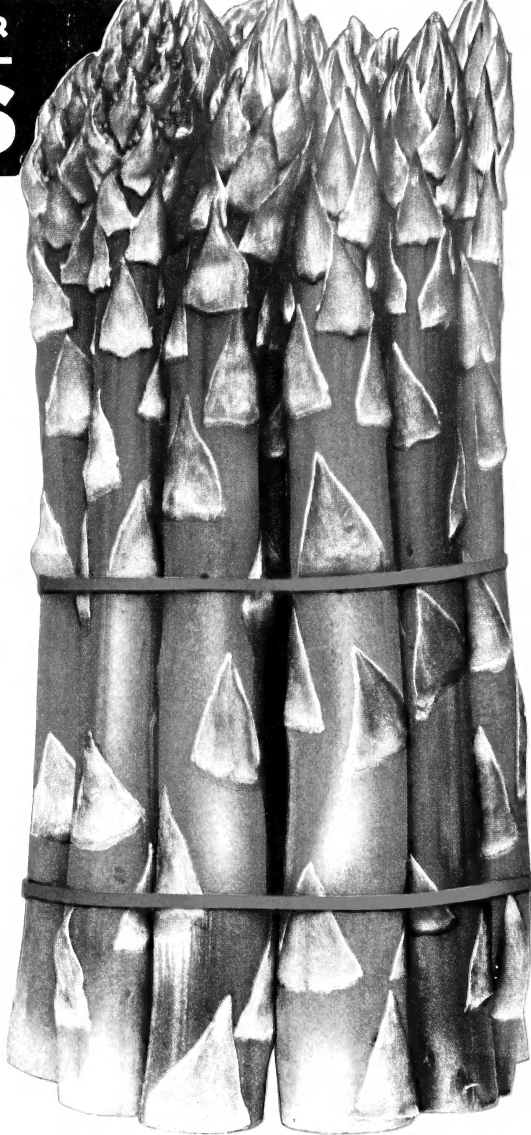

We can also furnish Barr's Mammoth, Conover's Colossal, Giant Argenteuil, Martha Washington, Palmetto and Pedigreed Washington Asparagus roots at the above prices.

New PARADISE Variety

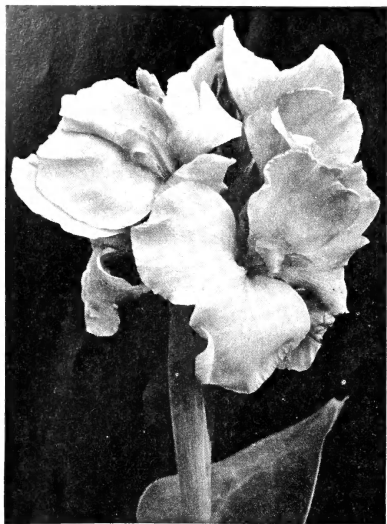

Sensational new, early maturing variety. Produces a normal crop in many instances one year earlier than ordinary varieties. Growers who have seen this asparagus growing have been amazed to see the straight, crisp, large stalks that were produced from roots set the previous spring. An exceptionally strong vigorous grower. Large, crisp, tender stalks with exceptionally fine, mild flavor. With today's trend of freezing vegetables for the market, it has another distinct advantage in that it retains its fresh flavor after freezing. Because it brings returns one year earlier than other varieties, and because of its great size, large crop and fine, mild flavor, plant Paradise in your Defense Garden this spring.

PRICES:

	25	100	250	1000
1 yr. No. 1	\$0.85	\$1.90	\$3.45	\$ 9.00
2 yr. No. 1	1.15	2.70	4.85	15.00
GIANT SIZE, EXTRA HEAVY	1.30	3.25	6.25	20.00

Above illustration features a bunch of Asparagus tips cut from a planting of Buntings' superior strain Asparagus crowns. We grow each year a million or more superior strain Asparagus crowns for the more discriminating class of commercial Asparagus growers and gardeners. Include in your order for your Defense Garden this year some Asparagus. There is nothing more delicious and healthful than freshly cut new Asparagus tips from your own garden.

Canna

Buntings' Superior CANNAS

A Selection of Varieties That Are Universal Favorites

We grow annually approximately fifty acres of Cannas, which makes one of the most colorful field scenes in our nursery during the months of July, August, September and a part of October. Since they bloom annually in our nurseries each year, we know our varieties are true to name.

The grade of plants we offer is not to be compared with many on the market which are small divided tubers. We supply large undivided tubers, which will give you much larger plants and a greater volume of flowers. Cannas are very hardy, and when planted in the spring as soon as possible after the danger of frost, they come up and grow quickly and give you a great profusion of bloom during the entire summer and fall.

Plant Cannas 18 inches apart each way. A round bed 7 feet across takes 19 bulbs — one in center, six in first row, and 12 in outside row. Plant in full sunlight, and do not plant too early.

CANNA VARIETIES:

Ambassador. Tall. Soft pink flowers, green foliage.
California. Medium. Orange-yellow flowers, green foliage.

Copper Giant. Tall. New. Giant flowers, old rose suffused with burnished copper; green foliage.

Hungaria. Tall. Pink flowers, green foliage.

King Humbert. Tall. Scarlet flowers; bronze foliage.

Louis Cayeux. Medium. A giant flowered bright rose scarlet; green foliage.

President. Tall. Red flowers; green foliage.

Yellow King Humbert. Medium yellow flowers; bronze foliage.

PRICES: Heavy tubers, 3 for 25c; 12 for 70c; 100 for \$4.50.

Canna Bed. 1 Copper Giant; 6 California; 12 President. All 19 heavy tubers for \$1.00.

Plant a solid bed of President. 25 President, heavy tubers, for \$1.25.

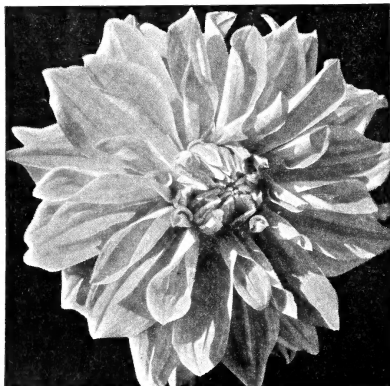

GLADIOLI-Selected Large Size Bulbs

ALBANIA. Pure glistening white flowers, wide open, broad petals, finely ruffled edges.

BETTY NUTHALL. One of the finest varieties. Large light salmon with pale yellow throat and light feathering of carmine.

BREAK O' DAY. Enormous flowers carried on erect stems. A magnificent pink with yellow pencil stripes on lower petals.

PRICES: Blooming size bulbs, 6 for 35c; 12 for 80c; 25 for \$1.10; 50 for \$2.00; 100 for \$3.85; 200 for \$6.95. (Not less than 6 bulbs of a variety sold.)

Dahlia

DEBONAIR. Shrimp-pink, with cream blotch color, undoubtedly the leading pink gladiolus.

DUNA. Soft light pink, pale yellow at ends of petals.

MARMORA. Of immense size, a pleasing shade of lavender carried on fine straight stems.

MARGARET FULTON. A distinctive rich, dark salmon; fine cut flower variety.

SOUVENIR. Deep yellow, graceful spikes.

DAHLIAS

Good, strong, healthy tubers, with excellent crowns and plenty of eyes. All varieties listed are Decoratives.

AVALON. Beautiful clear yellow; fine form on long stems.

ELINOR VANDERVEER. Satiny rose-pink. Tall and stately.

FRANCIS LAROCO. Most popular commercial yellow; profuse bloomer.

JAMES KERBY. A new large red; fine form and good stem.

JANE COWL. Large, shaggy flower of copper-yellow.

JEAN KERR. Pure white; flowers small. Early and vigorous.

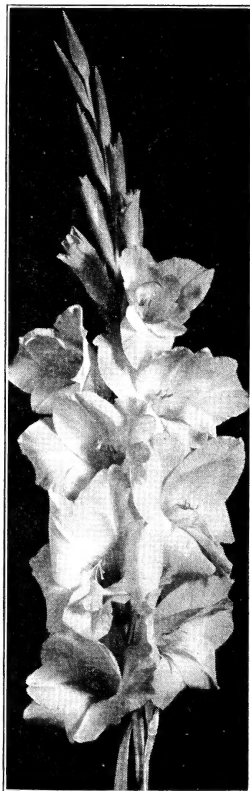

M. W. WILSON. Opalescent pink. Huge flowers of exhibition type.

MRS. WARNER. Orchid-pink with very large flower.

NATHAN HALE. Charming combination of bronze, golden and buff.

WHITE KING. The leading pure white with commercial growers.

Price: 20c each; 3 for 55c; 6 for \$1.00.

Gladiolus

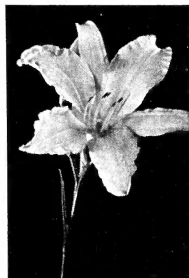

PERENNIALS LOVELY PLANTS That Bloom Each Year

Speedwell

Coreopsis

Day Lily

Gaillardia

Perennials thrive and bloom year after year. They give your yard all-season beauty. All Buntings' Perennials are strong, 2-year-old, field-grown plants.

SPEEDWELL (Veronica). Rich blue flower spikes in August. See illustration at left.

COREOPSIS (Tickseed). Pure yellow flowers from June to frost. See illustration at left.

DAY LILY (Hemerocallis). Bloom July and August; rich golden yellow to deep golden orange. See illustration at left.

GAILLARDIA (Blanket Flower). Blooms from June to November; brilliant orange-yellow red-centered flowers. See illustration at left.

PHLOX. Immense flower heads are carried on straight strong stems, from midsummer to autumn. Colors: White, pink, and purple. See illustration at right.

BLEEDING HEART. Lend a fine romantic touch to any garden. The true Old-Fashioned Bleeding Heart. Thrive in shade. See illustration at right.

BABY'S BREATH. Small, whitish pink flowers from July to September; excellent for cutting. See illustration at right.

FALSE DRAGONHEAD. Flowers lively pink, similar to Snapdragon. Blooms from July to September. Thrives in all soils. See illustration at right.

CUSHION 'MUMS. This compact bush is literally covered with hundreds of dainty flowers during late summer and fall. Colors: Pink, white, and bronze. See illustration below.

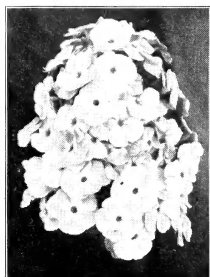

CHRYSANTHEMUMS. Blooms from late summer all through autumn. Excellent for bouquets. Colors: Red, white, and yellow.

DELPHINIUM. One of the most popular and best known perennials. The flowers are various shades of blue, produced on long stems starting in June.

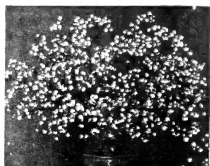

COLUMBINE (Aquilegia). This improved form of Columbine produces flowers 3 to 4 inches across, with long spurs, borne on graceful stems.

GERMAN IRIS. Flowers delightfully fragrant, lasting well into June; good for cutting.

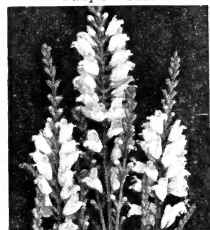

HARDY CARNATIONS. These beautiful flowers give you all the joy of greenhouse blooms right in your own garden. Colors: Pink, red, white, and yellow.

25c each; 3 for 65c; 6 for \$1.20.

Buntings' Landscape Department

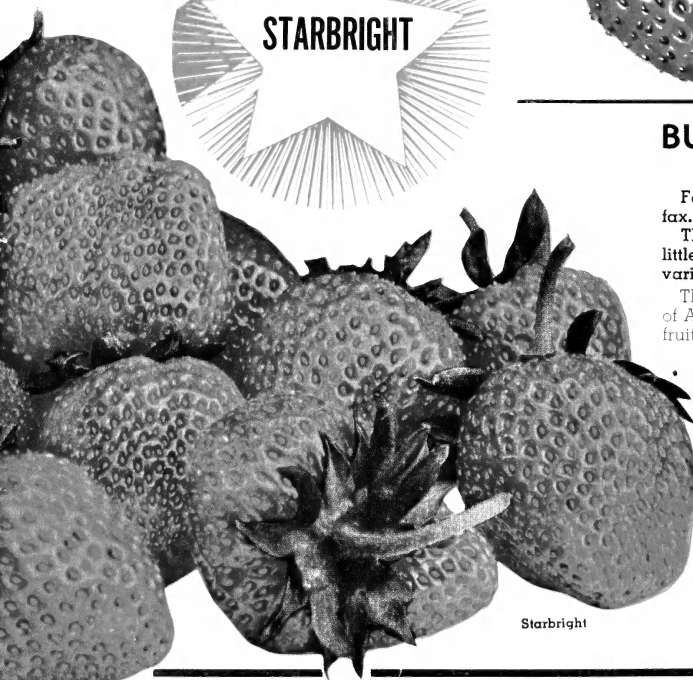

We maintain a complete Landscape Department, with skilled architects to make plans. If you have some extensive plantings to be made, consult this Department. Due to lack of space, we are not offering any stock in larger specimens of evergreens, ornamental and shade trees, flowering shrubs, etc. However, in our nurseries, comprising more than 1,000 acres, we can supply most varieties of evergreens, flowering shrubs, shade trees, etc., in specimen sizes from three to fifteen feet.

Pink Cushion
Mum

MASTODON

Any soil of high fertility will produce bumper crops of this outstanding everbearing variety. Mastodon is rightly named because it exceeds them all in size and in number of berries per plant during fruiting season, which extends from spring until late autumn. Delicious berries for home use.

Starbright

MASTODON EVERBEARING PRICES

100 plants for \$1.85
300 plants for 4.50
1000 plants for 12.50

See pages 14 to 19, inclusive, for complete descriptions and prices on other outstanding strawberry varieties.

BUNTING says "The Best Originated"

Far exceeding the well-known Dorsett and Fairfax.

The new Starbright is very similar to Fairfax, a little brighter red, and in quality resembles its varied parentage—Fairfax and Chesapeake.

This new creation of Dr. Darrow of the U. S. Dept. of Agriculture is a medium early variety with long fruiting season. It continues to produce extra large berries, uniform in size, until at least one-half the crop of late varieties has been harvested. Exactly like the illustration. Immensely productive, unexcelled shipping qualities. Strong grower, leathery, dark glossy green foliage.

Because this new variety is so outstanding, we recommend you plant it extensively. We, for commercial fruiting purposes, plant more Starbright than all other varieties combined, because it is more profitable in dollars and cents to us than any other commercial variety we have ever grown.

Price: 100 for \$1.50; 300 for \$3.60; 1000 for \$10.00.

BUNTINGS' NURSERIES SELBYVILLE DELAWARE
